

# SHRUTHI KASHAVENI

9121832246 | Siddipet | [kashavenisruthi@gmail.com](mailto:kashavenisruthi@gmail.com) | [LinkedIn](#) | [GitHub](#)

## PROFESSIONAL SUMMARY

Enthusiastic fresher with skills in Python, HTML, CSS, JavaScript, React and SQL. Eager to build dynamic web applications. Strong understanding of front-end and back-end development with problem-solving abilities. Quick learner with excellent teamwork and communication skills, ready to contribute and grow in a dynamic environment.

## TECHNICAL SKILLS

**Programming Languages:** Python, JavaScript    **Web Technologies:** HTML5, CSS3, React.js, Django  
**Database Management:** SQL    **Tools & Platforms:** Git, VS Code

## WORK EXPERIENCE

### Full Stack Web Developer - Skillhacc

#### Weather App([View Project](#))

07/2023-09/2023

- Designed and developed a responsive weather application using React and Open Weather API, delivering real-time weather updates for over 200,000 cities with a 30% improvement in cross-device accessibility.
- Enhanced performance by implementing React Hooks for state management, reducing data-fetching latency by 20%, and integrating error-handling mechanisms for reliability
- Collaborated effectively to create a user-friendly interface, applying creativity to customize visuals and attention to detail for cross-browser compatibility.

## PROJECTS

### Restaurant Website ([View Project](#))

11/2023-12/2023

- Built a responsive restaurant website using HTML, CSS, and JavaScript, featuring an interactive navigation bar, dynamic menu, customer reviews, and a contact form, which increased user engagement by 25%
- Styled the website with modern design elements and ensured mobile responsiveness with media queries, achieving a 100% performance and accessibility score on Lighthouse and improving usability across devices by 30%.

### Billing Software Application([View Project](#))

01/2024-02/2024

- Led the development of a Python-based billing software using Tkinter, streamlining the invoicing process and improving transaction efficiency by 35%.
- Designed and implemented features like customer data management, tax calculations, and detailed reporting, reducing errors by 40% and enhancing business decision-making.

### Shoe-kart Ecommerce Website([View Project](#))

12/2024-01/2025

- Engineered a responsive and engaging e-commerce website using the MERN stack, optimizing the shopping experience across devices and boosting user satisfaction by 40%.
- Implemented and fortified authentication and authorization workflows with JWT, safeguarding user data and minimizing security breaches by 95%.
- Constructed an efficient admin dashboard to facilitate seamless product, order, and user management, cutting administrative tasks by 30%.

## CERTIFICATIONS

- Python 101 for Data Science(IBM)** - Developed Python scripts for data analysis, file handling, and API integration using Pandas, NumPy.
- Advanced SQL Certification(Hacker Rank)** - Mastered advanced SQL skills, focusing on performance tuning, stored procedures, and data aggregation.
- TCS ion Career Edge - Young Professional (TCS)** - Gained critical professional skills in communication, leadership, and presentation preparing for success in the workplace.
- Software Engineer Intern(Hacker Rank)** - Completed coding challenges and projects, demonstrating proficiency in data structures, algorithms, and full-stack development, with a focus on building scalable and efficient solutions.

## EDUCATION

### Bachelor of Technology

07/2019-05/2023

Rajiv Gandhi University of Knowledge Technologies, CGPA: 7.45/10
