

Qureshi Saud Hussain

Developer

SUMMARY

I'm a Computer Science graduate with hands-on experience in full-stack web development, Unity game development, and a growing interest in data science. I've built responsive web applications using React, Express.js, MongoDB, and Tailwind CSS, and I've developed a sci-fi-themed puzzle game in Unity using C#. My projects include a feature-rich e-commerce platform, where I implemented user authentication and a dynamic product catalog, as well as an interactive game that blends immersive storytelling with engaging puzzles. I enjoy solving real-world problems through code and thrive in collaborative environments where I can learn, contribute, and grow as a developer.
