### PROFILE SUMMARY

---

Java Full Stack Developer with hands-on experience in building scalable web applications using Java and Spring Boot. Strong in REST API development, full-stack integration, and agile practices. Adept at applying design patterns, and object-oriented programming.

### EXPERIENCE

---

#### Software Developer

October 2024 - January 2025

*Itdose Infosystems*

*Noida, Uttar Pradesh*

- Built REST APIs using Spring Boot for lab test booking and reporting modules, enabling smooth cross-department data flow.
- Integrated Spring Boot APIs with Angular dashboards to improve usability and streamline test tracking.
- Improved API reliability through centralized exception handling, validation, and proper error structures.
- Documented APIs using Swagger and tested endpoints with Postman, helping QA teams validate features more efficiently.
- Designed and developed reusable UI components using Angular, Bootstrap, and Tailwind to speed up front-end development.

#### Junior Developer

July 2022 - June 2024

*IDS Logic Pvt Ltd*

*Noida, Uttar Pradesh*

- Developed backend services using Spring Boot for form submissions, file uploads, and content workflows.
- Built reusable UI components and integrated them with Java APIs to streamline front-end operations.
- Designed and maintained RESTful APIs with optimized request/response handling for better performance.
- Worked on single-page applications, improving overall load times and user experience.
- Maintained legacy WordPress systems and ensured compatibility, security, and smooth upgrades using modern PHP practices.

### PROJECTS

---

#### Employee Timesheet Management System | *Java, Spring Boot, MySQL*

- Developed a complete set of REST APIs for timesheet creation, submission, approval, and reporting.
- Designed and implemented a normalized relational database schema using JPA/Hibernate.
- Secured all APIs using JWT and Spring Security with proper role-based access control.
- Implemented approval workflows, status filters, and timesheet history to support real-use business operations.
- Wrote comprehensive unit tests using JUnit/Mockito to ensure code reliability and reduce bugs before release.

#### Online Patient Appointment Booking System | *Java, Spring Boot, MySQL*

- Developed a Spring Boot-based application for managing patient appointments.
- Implemented smooth scheduling and booking workflows to streamline the overall process.
- Implemented role-based authentication and session management using Spring Security for secure access control.
- Used Hibernate with DAO architecture for clean, maintainable, and scalable database operations.
- Built JSP pages with proper validation to enhance user experience and reduce booking errors.

### TECHNICAL SKILLS

---

**Languages:** Java, JavaScript, TypeScript

**Frameworks:** Spring Boot, Spring MVC, Hibernate

**Tools:** Git, Maven, Gradle, Docker, Postman, Jenkins

**Databases:** MySQL

**Others:** RESTful APIs, Swagger/OpenAPI, JUnit, JWT, OAuth2, Microservices

**Competencies:** Web Application Development, API Development, Application Security, Version Control

### EDUCATION

---

**Dr. APJ Abdul Kalam Technical University, Lucknow**

*Bachelor of Technology - Information Technology*

Mathura, Uttar Pradesh

*July 2018 - Sept 2022*
