## Summary

Motivated and detail-oriented Cyber Security Intern with hands-on experience in identifying vulnerabilities, analyzing security risks, and supporting incident response activities. Proficient in tools such as Wireshark, Nmap, and Splunk, with foundational knowledge of network security, threat analysis, and ethical hacking. Quick learner with strong problem-solving skills, eager to contribute to a dynamic security team and grow in the field of cybersecurity.

## Education

### Bachelor's in computer application

Sushant University • Haryana, India  
05/2025

## Skills

HTML, CSS, JAVASCRIPT, NMAP, SQL, ELK STACK, SPLUNK, WIRESHARK, UBUNTU, NESSUS, OSSEC, MISP, VAPT, IDS

## Project

### File Integrity Management System

- Created a robust File Integrity Monitoring FIM system.
- Used PowerShell scripting to ensure data security and integrity of confidential files.
- FIM notifies admin in case of any unauthorized changes, which would help in incident response.

### School Security System Using RFID and GPS

- A school security system using RFID and GPS enhances safety by tracking student movements.
- RFID tags monitor entry and exit points, ensuring authorized access, while GPS tracks real-time location during commutes.
- This integration enables precise attendance, swift emergency responses, and improved asset management.

## Certificates

Network Defense Essential, Digital Forensic Essential, Introduction to Dark Web, Anonymity and Cryptocurrency, Ethical Hacking Essentials, AWS Cloud Quest

## Languages

English, Hindi
