Profile Summary

With nearly 14 years of expertise in Business analysis/Data analysis and client support, I have excelled in strategic analysis, risk management, and business development. I am currently overseeing the strategic growth of retail assets and ensuring top-line profitability at an international organization, managing a team of over 50 associates. I am proficient in statistical, machine learning s data mining techniques and have worked on SQL s other database tools for data management. I pioneered the implementation of advanced data analysis tools like Power BI and Tableau, resulting in a 15-20% surge in client acquisition. I am skilled in Python programming, data analytics, and financial modeling, leveraging these skills to drive strategic decision-making and business growth.
