Professional Summary

Software Engineer with 1 year of experience in Core Java, Spring Boot, REST APIs, React.js, Oracle, and microservices architecture. Skilled in designing and building scalable enterprise applications, with hands-on experience across the full software development lifecycle. Strong at debugging, troubleshooting, and optimizing performance. Familiar with Agile practices and DevOps workflows, including CI/CD pipelines and Jenkins.

SKILLS SUMMARY

- **Programming Languages:** Java, JavaScript, SQL
- **Back-End Technologies:** Spring Boot, Spring MVC, Restful APIs, Microservices, API Integration
- **Front-End Technologies:** React, HTML5, CSS3, Bootstrap
- **Database Design & Modeling:** MySQL, Schema Design, Query Optimization
- **Tools & Platforms:** GitHub, JIRA, CI/CD

Professional EXPERIENCE

Software Engineer

Retail Sols Inc | Hyderabad, India AUG 2024 – PRESENT

Projects

WebPOS – Web Based Point of Sale Application

Technologies: Java, Spring Boot with Microservices, React.js, Kafka

Project Summary

- WebPOS is a cross-platform, web-based point-of-sale application designed for tablets, desktops, and mobile devices to deliver a seamless customer experience. It enables store associates to quickly process sales, manage inventory, and handle customer transactions from anywhere on the sales floor. The solution supports real-time data synchronization, secure payment processing, and dynamic product catalog management to improve operational efficiency.

Responsibilities/Deliverables:

- Designed and developed **RESTful APIs** using **Spring Boot microservices** for secure and efficient communication between frontend and backend services.
- Built responsive UI components with **React.js** and implemented smooth data rendering, filtering, and pagination for large product catalogs.
- Leveraged **Kafka** for event-driven communication, enabling real-time updates for inventory, order status, and transactions.
- Optimized Oracle SQL queries and stored procedures to improve performance and transaction speed.
- Collaborated with QA and product teams to troubleshoot and resolve complex issues, reducing production defects.
- Participated in Agile ceremonies, contributed to sprint planning, and ensured timely delivery of features using **CI/CD** pipelines with Jenkins.

EDUCATION

Gitam Deemed to be University – Bangalore, India
BTech – Computer Science and Engineering (CSE) | CGPA: 7.89 | 2019 - 2023
