---

## SUMMARY

Highly skilled AWS Cloud Engineer with 3 years of experience in designing, deploying, and managing cloud infrastructure solutions. Proficient in leveraging AWS services to optimize performance, ensure scalability, and maintain high availability of applications. Adept at automating workflows, monitoring systems, and implementing robust security practices to support business objectives. Strong collaborative skills with a proven ability to troubleshoot complex issues in dynamic environments.

---

## WORK EXPERIENCE

Cloud Engineer

Mphasis, Pune 02\2022 –

Present

- **Design, Deploy, and Manage AWS Infrastructure:**

- Architect, deploy, and maintain scalable and secure AWS environments including VPCs, EC2 instances, S3, RDS, and other services.

- **Monitoring and Performance Optimization:**

- Utilize AWS CloudWatch, CloudTrail, and other monitoring tools to ensure optimal performance and availability of AWS resources.

- **Security Management:**

- Implement and manage security best practices including IAM policies, security groups, NACLs, and data encryption.

- **CI/CD Pipeline Implementation:**

- Set up and manage continuous integration and continuous deployment pipelines using AWS CodePipeline, CodeBuild, and CodeDeploy.

- **Infrastructure as Code (IaC):**

- Deploy and manage infrastructure using AWS CloudFormation, Terraform, or AWS CDK for consistent and repeatable deployments.

- **Backup Solutions:**

- Design and implement backup strategies using AWS Backup, EBS snapshots, and S3 versioning to ensure data durability and availability.

- **Disaster Recovery Planning:**

- Create and maintain disaster recovery plans including multi-region failover, data replication, and automated recovery procedures.

- **Network Configuration:**

- Configure and manage AWS networking components like VPCs, subnets, route tables, NAT gateways, and VPN connections.

- **Security Compliance:**

- Ensure AWS environment complies with security policies and regulations, conducting regular security assessments and audits.

- **Backup Solutions:**

- Design and implement backup strategies using AWS Backup, EBS snapshots, and S3 versioning to ensure data durability and availability.

- **Disaster Recovery Planning:**

- Create and maintain disaster recovery plans including multi-region failover, data replication, and automated recovery procedures.

## KEY SKILLS

- Cloud Platforms: AWS (EC2, S3, RDS, Lambda, VPC, IAM)
  - Automation & Configuration: AWS CLI, Terraform, CloudFormation
  - Monitoring & Logging: CloudWatch, CloudTrail, Systems Manager
  - DevOps & CI/CD: CodePipeline, CodeBuild, CodeDeploy
  - Security & Compliance: IAM, Security Hub, WAF, Shield, Config
  - Networking: VPC, Direct Connect, VPN
  - Backup & Recovery: AWS Backup, EBS Snapshots, Elastic Disaster Recovery
  - Cost Management: Cost Explorer, Budgets, Cost and Usage Report
  - Linux commands
- 

## CERTIFICATION

- Architecting Solutions Of AWS
  - Technical Essentials Of AWS
  - Linux Fundamentals
- 

## LANGUAGES

- English
  - Hindi
  - Marathi
- 

## STRENGTHS

- Flexibility And Adaptability To Work In Any Environment.
  - Willingness To Accept Any Challenge Irrespective Of Its Complexity.
  - Good Team Player And Positive Attitude.
  - Leadership-Always Loves To Take Ownership Of Tasks.
  - Strong problem solving skills,critical thinking
- 

## EDUCATION

- B.Tech/B.E. - Computers  
2021  
University of Mumbai, Mumbai
-
