🐙 ShubhamYewale

SUMMARY

- Computer Engineering graduate with expertise in **Java, Spring Boot, React, and SQL**.
- Developed **web applications** with **authentication, database management, and RESTful APIs**.
- Passionate about building scalable web solutions, optimizing performance, and solving complex technical challenges.

EDUCATION

D Y Patil College Of Engineering, Pune

Bachelor of Engineering in Computer Engineering - CGPA: 7.83

November 2022 - June 2025

D Y Patil Polytechnic, Pune

Diploma in Computer Engineering - 73%

November 2020 - June 2022

SKILLS

Languages: Java, SQL, C Programming

Frameworks: Spring Boot, Hibernate, Spring Security, React

Tools: Git, Visual Studio, IntelliJ, Postman

Software Architecture: REST API, Microservices

PROJECTS

IndianTourandtravelpvt.ltd [🔗](#)

September 2024 - February 2025

Web-based application for online booking of various tours.

Technologies Used: Java, J2EE, Spring Boot, ReactJS, MySQL

- The main objective of the project is to create a fast, effective and reliable online working platform to develop a communication system between customers and the agency.
- We have implemented authentication and authorization so that only authorized users can register, log in, and book a tour. Also, users can search for a particular tour based on duration, cost, and date, and on successful booking, a bill will be generated.

Farmer Support System

In Progress – 50% Complete

Technologies Used: Java, Spring Boot, React, MySQL, Spring Security, REST APIs

- Built a full-stack agriculture platform to support Indian farmers with daily operations.
- Implemented multilingual role-based login and smart crop suggestions.
- Integrated OpenWeatherMap API for real-time weather updates.
- Added SMS notifications for weather and scheme alerts.
- Developed modules for government scheme applications and expert consultations.
- Enabled equipment rental and direct crop selling features.
- Admin dashboard for managing users, schemes, inventory, and OpenAI-powered chatbot.

Smart Contact Manager [🔗](#)

February 2025 - March 2025

- A web-based contact management application. A web application that allows users to securely save and manage contact information. Key features include secure authentication, CRUD operations, search functionality, and a responsive user interface. The application is developed using Spring Boot, MySQL, Hibernate, and Spring Security, following the MVC architecture and RESTful API principles.

CERTIFICATE

Full Stack Developer – .NET Core [🔗](#)

- Completed a Full Stack .NET Developer certification from Seed Infotech, including industrial training in ASP.NET Core, Web API, and MVC
