SUMMARY

Passionate Java Full Stack Developer Trainee with hands-on experience in Java, SQL, React, JDBC, J2EE, and Spring Core. Developed projects including a Student Management App and Spotify Clone, demonstrating effective integration of front-end and back-end technologies. 5 Star HackerRank in DSA. Eager to apply skills in real-world software development and innovation.

EXPERIENCE

Java Full Stack Developer (Student Trainee)

Pentagon Space

May 2025 - Present, Bangalore, IN

- Developed a Full stack Student Application Project using JDBC API and J2EE Architecture to store Student data and perform course purchases.
- Developed a Frontend Application (Clone of Spotify website) using React js and Tailwind CSS.
- Demonstrated advanced problem-solving skills by mastering a diverse range of DSA challenges and attained a 5-star rating on the HackerRank platform.

Cyber Security intern (Student)

Elewayte

May 2024 - June 2024, Bangalore, IN

- Completed Elewayte online classes, acquiring foundational knowledge in ethical and unethical testing practices and developing proficiency in managing operating systems using VMware and VirtualBox.

Community Representative

getSync (formerly himan)

June 2023 - August 2023, Bangalore, IN

- Transformed diverse data sources from websites and web pages into standardized formats using tools such as Excel and databases, maintaining strong data consistency throughout each project.
- Assisted customers throughout their event journeys by leveraging event management tools and providing real-time updates to improve satisfaction.

PROJECT

Simple Spotify Clone

Pentagon Space · October 2025 - November 2025

- Developed a Spotify clone website, replicating its user interface to demonstrate advanced front-end development and UI/UX design expertise.

Student Application

Pentagon Space · September 2025 - October 2025

- Utilized JDBC API to integrate Java application with database systems, supporting reliable storage and retrieval of student application data.
- Configured frontend components in alignment with backend functionality to ensure consistency in data presentation within the Student Application using JSP technology.
- Configured and deployed Student Application on Apache Tomcat server, optimizing interaction between frontend and backend using J2EE and JDBC API.

EDUCATION

Bachelor of Computer Applications

Nrupathunga University · Bangalore, IN · 2025 · 9.22 CGPA

Pre University(PCMB)

Sree Ayyappa Education Centre · Bangalore, IN · 2022

SKILLS

Java, SQL, JavaScript, HTML/CSS, J2EE, JSP, React.js, Spring core, JDBC API, Bootstrap, Tailwind CSS, Object-oriented programming, Software development principles, Core Java, Programming in Java, Git hub Configuration.

Passionate, Skilled, Team Lead, Public Speaker, Social.
