SCHOLASTIC PROJECTS

Vehicle Tracking System Using GSM Module

A VEHICLE TRACKING SYSTEM is an electronic device installed in a vehicle to Enable the owner to track the vehicle's location as well as monitor additional vehicle characteristics. We intend to use the GSM Modem as a way of communication via SMS.

Line Follower Robot

In this project we make a Robot who follows the BLACK color line only. For this purpose we use Sensors who recognize the Black color line. And our Robot follows only that path. We make this project using an Embedded system.
