Technical: SQL Server, MySQL, Dot Net, Java, HTML, css, JavaScript, React.js

Tools: GitHub, IIS

CERTIFICATIONS

- Diploma in Advanced Computing from CDAC *SEP 2022 – MAR 2023*
Acquired comprehensive knowledge of software development, databases, and system design through practical projects and industry-oriented training.

PROJECTS

CRM tool

- Contributed to developing and enhancing customer management features such as dynamic reporting, role-based data access, and custom field management in new customer forms.
- Improved application efficiency by implementing PDF report generation with iTextSharp, optimizing stored procedures with CTEs and dynamic SQL, and making APIs more scalable and maintainable.

HRMS

- Worked on workstation and geofencing modules, implementing latitude/longitude-based punch-in and punch-out for accurate employee attendance tracking.
- Enhanced leave management workflows by applying dynamic business rules, improving overall system reliability, performance, and user experience within the unified HRMS application.
