

CAREER SYNOPSIS:

- Having 3+ Years of experience in Web application development.
- Experience in developing User interface (UI) Applications and professional Web Applications using Web Standards, **HTML5, CSS3, JavaScript, Angular JS, RxJS and NgRx.**
- Experience in Component, Routing, Validation Using **Angular.**
- Experience in building single page application and desktop support using Angular.
- Experience in creating User Controls, Web Forms and client-side **validations** using JavaScript and Angular.
- Extensive knowledge of Html5, CSS3 new features and DOM functions.
- Proficient in writing Clean, Maintainable code with JavaScript and integrating RESTful APIs.
- Skilled in RxJS for managing asynchronous data streams using Observables, Subjects and Operators
- Knowledge on NgRx for robust state management, including setting up actions, reducers, effects and using selectors to access global state.
- Optimized frontend performance through advanced techniques such as lazy loading and change detection strategies, improving user interaction speed.
- Familiar with Git and GitHub for version control, Branching strategies and collaborative development workflows.
- Key contributor to the Cognitive Network Operations (CNOPS) project, enhancing user experiences and optimizing the frontend for scalability and performance.
- Excellent interpersonal abilities, communication skills, time management and team skills with an intention to work hard to attain project deadline sunder stressful environments.
- Worked in Agile teams to meet strict project deadlines and deliver quality code.

ACADEMIC CHRONICLE:

- Bachelor of Technology in ECE from AP IIIT RGUKT RK Valley in 2021.

ACHIVEMENTS:

- Received formal recognition from TCS NSS for implementing innovative strategies.
- Certificate of Completion of Courses (2022) Several certificates provided by Coursera and Udemy.

Technical Expertise	
Frontend Development	Angular, JavaScript, RxJS, NgRx, HTML/CSS,Bootstrap
Tools/Utilities	Visual Studio code
Version Control	GitLab, GitHub
Database	SQL Server
Operating System	Windows and Linux
Bug Tracking Tools	Jile

ORGANISATIONS:

- Currently Working as a web developer in **Tata Consultancy Services** from Feb 2022 to till date.

PROJECTS

Project: Cognitive Network Operations (CNOPS) – BSNL

Domain: Telecom (Network Solutions and Services)

Role: Product Engineer

Tools: HTML, CSS, Angular, JavaScript, RxJS, NgRx

Roles and Responsibilities:

- Developed front-end modules to provide real-time data visualization and user interfaces for the CNOPS system.
- Used Angular to design and implement complex, responsive UI components, ensuring high performance across devices.
- Consumed backend REST APIs to display network data but did not contribute to backend development.
- Developed dynamic and responsive Angular interfaces for monitoring RESTful APIs, enhancing user experience and application performance by over 50%.
- Built reusable and maintainable UI components, improving development efficiency and reducing code redundancy.
- Optimized frontend performance through advanced techniques such as lazy loading and change detection strategies, improving user interaction speed by 15%.
- Creating client-side form validations using template driven and reactive forms.
- Creating components, directives and pipes Using Angular.
- Fixing issues / fixing bugs.
