📁 PROJECTS

Opoto - E-commerce Platform

Website: opoto.in

Developed a scalable eCommerce platform supporting pan-India and hyperlocal deliveries.

Tech Stack: React, Axios, Python, PostgreSQL

- Integrated frontend with backend APIs using Axios.
- Implemented hyperlocal delivery logic based on geolocation.
- Managed product listings and dynamic cart functionality.

eLearning - Educational Platform

Website: elearning.krisantec.com

An online platform for course purchases and real-time learning sessions.

Tech Stack: React, Axios, Python, PostgreSQL, Zoom, Agora

- Enabled real-time classes via Zoom and Agora integration.
- Dynamic course purchase reflected on user dashboard.
- Built user-friendly learning module navigation.

Leela - Hospital Services Static Website

Website: leelahospitals.krisantec.com

Static website to showcase hospital services and contact information.

Tech Stack: React

- Designed responsive UI layouts.
- Developed modular, reusable components.
- Clean and SEO-friendly routing.

GenAlpha - Event Booking Platform

Website: generationalphaevent.com

Real-time event scheduling and ticket booking system.

Tech Stack: React, Axios, Python, PostgreSQL

- Live event display and cart-based booking system.
- Dashboard reflects added events
- Smooth checkout and registration flow.

PERSONAL PROJECT

MERN STACK

blinkit-ecommerce type

Tech Stack: React.js, Node.js, Express.js, MongoDB, Bootstrap, Axios, JWT

Description:

Developed a full-featured eCommerce platform using the MERN stack with both user and admin functionalities.

Key Features:

-User Panel: Product browsing, search, filtering by category, cart management, and secure checkout with card payment integration

-Admin Panel: Product management (add/edit/delete), category management, order tracking, and user access control.

Authentication: Implemented secure login/register system with JWT-based token authentication.

-Responsive UI: Built mobile-friendly and responsive layouts using Bootstrap and custom CSS.

-Real-time Feedback: Toast notifications and loading indicators for better UX.

RESTful APIs: Built scalable backend APIs using Express.js and MongoDB for product, cart, and order operations.
