## PROJECTS

### Jobs At Mail (Job Portal)

**Technology:** .Net Framework MVC, C#, MS SQL Server, HTML, CSS, JavaScript, Bootstrap.

**Description:** I developed a job portal enabling users to log in and easily find jobs that match their preferences, streamlining the job search process. The platform offers a user-friendly interface for efficient exploration and discovery of tailored employment opportunities.

### CRM (Web Site)

**Technology:** .Net Framework ASP, C#, MS SQL Server, HTML, CSS, JavaScript, Bootstrap.

**Description:** I have developed a Customer Relationship Management (CRM) system where my client can interact with their customers and efficiently manage the sales of medicines with them. This system facilitates seamless communication between my client and their customers, allowing for effective management of the sales process.
