## About Me

A motivated and hardworking graduate seeking an entry-level position in a dynamic organization where I can apply my technical knowledge, communication skills, and willingness to learn, while contributing to the overall success and growth of the company.

## Skills

### Programming Languages:

C, Python, Java (Basics)

### Frameworks: Flask

### Web Technologies: HTML, CSS

### Database: SQL (Basics)

### Tools: Github, Canva

**Soft Skills:** Effective Communication,

Time Management, Active Listening,

Quick Learner, Typing (45 WPM), MS

Office(Word,Power Point,Excel)

## EDUCATIONAL QUALIFICATIONS

- BTECH (CSE)** 2021-2025  
*Tirumala Engineering College*  
8.37 CGPA
- Pre-Graduation** 2019-2021  
*Sri Chaitanya Girls Junior Kalasala*  
91.8%
- SSC** 2018-2019  
*Sri Chaitanya School*  
87.4%

## CERTIFICATIONS

- Python (Basic) — Hacker Rank
- Cloud Computing – Nptel
- Python Programming (Python for Everybody)- Coursera
- Foundations of CyberSecurity – (Google) Coursera
- Python Foundation Certification — Infosys Springboard

## INTERSHIPS

- Financial literacy** 2 Months  
*LMS Platform*  
Financial literacy is the cognitive understanding of financial components and skills such as budgeting, investing, borrowing, taxation, and personal financial management. The absence of such skills is referred to as being financially illiterate.
- Machine Learning** 2 Months  
*SkillDzire Platform*  
Machine Learning (ML) is a subset of AI that enables systems to learn from data and improve performance without explicit programming. It uses algorithms to identify patterns, make predictions, and automate decisions.

## PROJECTS

### QR-CODE

A QR Code (Quick Response Code) is a two-dimensional barcode that stores data like URLs, text, or other information in a scannable format. Implementing QR codes using HTML allows web developers to display or generate these codes on websites, enabling users to scan them with their smartphones or devices for quick access to information.

### NEXT WORD PREDICTOR

Next word prediction, also referred as Language Modelling, is the process of predicting what word or multiple words come next in an application involving the basic task of typing. We have been gradually accustomed to our mobile keyboards predicting the next word without even realizing it.
