Profile

Hello...I'm, Durwang Deotale at the college of G H Rasoni University, Amravati and currently I'm, Undergraduate student, with a strong passion for data analytics who is driven and enthusiastic. having a strong foundation in statistical methodologies and data analysis procedures that they have learned through coursework and practical projects. competent with Python, Numpy, matplotlib, machine learning, deep learning, scikit-learn, statistical analysis, chat gpt, tensor flow, seaborn, pandas, Excel, tableau, power bi, and SQL for data visualization and interpretation. Excellent problem-solving abilities combined with a proactive approach to picking up new skills and techniques. I'm excited to use my analytical abilities to gather insightful data and support well-informed decision-making in a dynamic team environment.

Work Experience

Internship Studio ▪ Pune, Maharashtra, India

Data Analyst Intern (Remote)

During my data analytics internship, I was able to immerse myself in the realm of data while applying academic knowledge to real-world business issues. My role entailed collaborating with diverse teams to analyse massive datasets, provide insights, and support data-driven decision-making inside the organisation. The experience not only improved my technical skills, but also gave me a better knowledge of how data influences corporate plans and operations.

Education

GH Rasoni University, Amravati (Nagpur Campus)

B.Tech (Computer Science and Engineering)

09/2023 – 06/2026

Skills

- Microsoft Excel
- MySQL
- SQL
- Python(Programming language)

- Machine Learning
 - Deep Learning
 - Data Visualisation
 - Data Analysis
 - Tableau
 - Power bi
-

Languages

- English Professional
 - Hindi Professional
 - Marathi Professional
-

Certificates

complete python programming for beginners ▪ Udemy

Projects

Title: Final Sales Data Analysis Report for a Retail Chain

Project Overview:-

1. **Data Collection & Setup:**
 - Downloaded retail transaction data from Kaggle.
 - Established a SQL database, created tables, and loaded the dataset.
2. **Data Cleaning & Preparation:**
 - Handled missing and inconsistent data using SQL and Python (pandas).
 - Created new fields like total sales value and time-based analysis fields.
3. **Data Analysis:**
 - Used SQL and Python libraries (pandas, matplotlib, seaborn) for data exploration and trend identification.
 - Performed advanced analyses such as time series and cohort analysis.
4. **Reporting:**
 - Generated tabular and visual reports to display sales by product, store, and time period.
 - Automated report generation and presentation using Excel and Python.
