Experience

Programmer Analyst Trainee

2023/01 – 2023/06

I received training in SAP Hybris technology, where I gained knowledge and hands-on experience. I applied this expertise to develop a project, showcasing my ability to work effectively with this technology.

Trainee – Ceptra Infotech

2022/04 – 2022/05

I completed training in Salesforce functional aspects and worked on a project centered around a Hospital Management System. During this training, I gained expertise in Salesforce and utilized these skills to develop an efficient and comprehensive solution for managing hospital operations.

Declaration

I hereby declare that the above information given by me is true and correct to the best of my knowledge. I am expecting the opportunity to work with your worthy of your choice.

Projects

1) ATM Simulator

The ATM Simulation Project allows users to perform cash withdrawals using either QR code scanning or code entry. It features secure authentication with card number and PIN, and a user-friendly interface built with React, HTML5, CSS, and JavaScript. The backend, developed with Java and Spring Boot, handles transactions and account management, while MySQL is used for database storage. This project provides a practical and interactive way to simulate ATM operations, demonstrating modern technology and user-friendly design.

Medical Management System

A Medical Management System with dedicated modules for Admins to manage medicines and orders, and for Users to log in, place orders, and manage their account details.
