

As a Frontend Web Developer with 3 years and 5 months of hands-on experience, I have honed my skills in building highly responsive and user-centric web applications. My primary focus has been on frontend technologies, leveraging frameworks like React and Next.js, combined with a solid understanding of backend development through six months of active experience with Node.js and Express.js. My expertise lies in delivering high-quality, performant, and maintainable code within the MERN (MongoDB, Express, React, Node) stack ecosystem.
