SUMMARY

I am a dedicated BCA student and aspiring Web Developer with a strong foundation in frontend technologies including HTML, CSS, and JavaScript. My project experience encompasses developing an Employee Management WebApp and an e-commerce website, showcasing my ability to implement user-friendly designs and robust functionalities. I am keen on further enhancing my skills in web development

EXPERIENCE

Web Developer

OCTANET Pvt Ltd 08/2024 - 09/2024 Remote

Web development company focused on creating responsive web applications

- Developed responsive web applications by integrating RESTful APIs and enhancing front-end functionality using HTML, CSS, and JavaScript
- Strengthened skills in API integration, debugging, and responsive design through real-world project experience
- Collaborated with a small team, participated in code reviews, and contributed to delivering project milestones on time

EDUCATION

12th

(PCM)

2021 - 2022 Up, India

BCA

Greater Noida Institute Of Technology

08/2022 - 07/2025 Greater Noida, India

SKILLS

HTML CSS JS PYTHON SQL EXCEL Basic C & C++

DEVELOPER TOOLS

VS Code

PyCharm

My SQL Workbench

Github

KEY ACHIEVEMENTS

Website Optimization

Increased website response time by 30% using optimized frontend techniques.

Team Leadership

Led a team of 3 in developing a web app, completing project 2 weeks early.

LANGUAGES

English

Advanced

PROJECTS

Employee Management WebApp

Technology used - Python & SQL

Developed a robust Employee Management System using Python for the front-end logic and MySQL for the back-end database. This system allows administrators to manage employee records efficiently, including functionalities such as adding, updating, deleting, and viewing employee details. The application includes a secure login system and user-friendly GUI built with Tkinter (or CustomTkinter, if used), enabling smooth navigation and interaction.

- CRUD operations (Create, Read, Update, Delete)
- Integrated MySQL database for data storage and retrieval
- Clean and responsive GUI using Tkinter

E-Commerce Website

Technology used - HTML, CSS & JS

Designed and developed a fully responsive E-commerce website using core web technologies—HTML, CSS, and JavaScript. The website features a modern UI/UX layout optimized for desktops, tablets, and mobile devices. Implemented essential E-commerce functionalities like product listings, shopping cart, and interactive UI elements to enhance user experience.

- Home, Product, About, and Contact pages
- HTML & CSS: Structured and styled the website for mobile/desktop responsiveness
- Product cards with image, price, and description
- Smooth scrolling and interactive animations
