## SUMMARY

I'm a software developer with 4 years of experience creating solutions that address the unique challenges in industries like transportation, manufacturing, health & fitness. With experience in C#, ASP.NET, and React, I build applications that improve operational efficiency, enhance customer experience, and support business growth. Driven by a passion for delivering meaningful results, I focus on creating scalable, efficient solutions that streamline processes, support business growth, and improve user experience. I thrive in collaborative environments and adapt quickly to new tools and project requirements to deliver high-impact solutions.

## EXPERIENCE

### Software Engineer | Courierspace, Inc.

05/2024 to Present

- Developed and enhanced features for Courier Cloud, a comprehensive transportation management system for expedited shipping providers. This platform facilitates both domestic and international shipping needs, including next-flight-out, local messenger services, time-critical/same-day shipping, service parts logistics, freight, and supply chain management.
- Utilized skills in C#, ASP.NET, and React to build scalable, user-friendly applications that streamline logistics operations.
- Collaborated with cross-functional teams to implement robust APIs and improve system functionalities, ensuring alignment with industry standards.
- Employed asynchronous programming techniques to optimize performance and enhance user experience, driving operational efficiency for clients.

### Software Engineer | Ogma Inc.

09/2020 to 05/2024

- Developed and maintained applications for transportation, industrial, and health & fitness sectors, including systems for order creation, real-time tracking, client management, warehouse logistics, and production processes.
- Utilized skills in C#, ASP.NET, React to build scalable, user-centered applications that align with business goals and industry standards.
- Integrated Stripe for secure payment processing, enhancing transaction efficiency and user satisfaction.
- Employed asynchronous programming techniques to optimize application performance.

### Software Lecturer | Ogma Knowledge Center

09/2019 to 09/2022

- Delivered comprehensive instruction in software development topics such as C#, ASP.NET, React, and database management.
- Developed and implemented engaging curriculum and lesson plans tailored to the diverse strengths and weaknesses of students, utilizing feedback to enhance learning outcomes.
- Managed students' behavior and fostered a supportive classroom environment, facilitating hands-on learning through practical projects and collaborative exercises.
- Mentored students in their programming journeys, providing guidance on projects and career development.

## EDUCATION

### Software Engineer | Ogma Knowledge Center

2017 to 2019

### Masters Degree, Economics | Yerevan State University

2011 to 2013

### Bachelors Degree, Economics | Yerevan State University

2007 to 2011

### American English Pronunciation and Communication | Rachel's English Academy, US

2024

## SKILLS

C#	JavaScript	TypeScript
ReactJS	Redux	ASP.Net
.NET Core	.NET Framework	Web Technologies and Internet Protocols (ReST, XML, HTTP, TCP-IP)
MySQL	Asynchronous Programming	Stripe
CI/CD pipelines, Azure DevOps, AWS, Git	Object Oriented Programming (OOP/OOD)	

## LANGUAGES

Armenian - native

English - proficient
