## Cyber Security Analyst

chetanrbhojar@gmail.com | 7507474126 | Pune,India | linkedin.com/in/chetan-bhojar-a29885191

### PROFILE

---

A skilled and result-oriented Cyber Security Analyst with over 4.5+ years of experience in cybersecurity, working for global BFSI clients. Performed monthly client reporting and vulnerability scanning for in-scope servers and remediated issues within time. Fixed the vulnerabilities found in penetration testing and shared the validated report after remediation. Demonstrated hands-on experience in SIEM, IAM, WAF, and Security Operations (SOC) tools. Received multiple awards and recognition for outstanding performance and innovation. Aspires to advance in the cybersecurity domain by leveraging a comprehensive skill set to provide innovative solutions to complex security challenges.

### PROFESSIONAL EXPERIENCE

---

**Tata Consultancy Services, Cyber Security Analyst**

2021 – present | Pune, India

#### **Roles & Responsibilities:**

#### **Vulnerability Management, Detection and Assessment (Qualys, CrowdStrike, Imperva, LogRhythm) :**

- Managed a vulnerability portfolio of over 5,000 servers, identifying and remediating 95% of critical vulnerabilities within 30 days of discovery.
- Directed and protected a fleet of over 14,000 servers using CrowdStrike, achieving a 99% compliance rate.
- Detected and mitigated 50+ risks through advanced detection and alert mechanisms, applied variable host groups regularly, and included exclusions to optimize performance while maintaining complete threat coverage.
- Onboarded and managed over 25 unique URLs on the Imperva Web Application Firewall.
- Enforced robust security policies and tailored redirection rules on WAF, alleviating 120+ potential cyber threats monthly.
- Directed the LogRhythm SIEM environment comprising approximately 80 collectors, overseeing security for 15,000 Unix and Windows servers.
- Conducted daily analysis of 25+ network and user logs, including RSA, leading to identifying 5+ potential threats and subsequently implementing syslog and firewall rules that significantly strengthened the security posture.
- Conducted monthly targeted and comprehensive vulnerability and policy compliance scans, resulting in an average 20% reduction in overall vulnerabilities.
- Created dashboards and prioritization reports, reducing remediation time by 50% and improving risk management by 30%.

#### **Security Monitoring :**

- Operated in a 24x7 high-paced environment, maintaining a 99% uptime for security monitoring systems.
- Collaborated with network, application, and system administrators to resolve security issues, reducing incident resolution time by 40%.
- Resolved over 50 incidents and 100 change requests within established SLAs, achieving a compliance rate of 100%.
- Investigated user-reported phishing emails and reduced successful attacks by 100% through static analysis, header inspection, and sandboxing.

#### **Customer Champion:**

- Managed 8 clients over a period of 4.5+ years and was made a customer champion for 3 Major BFSI giants based in the UK.

#### **Penetration Testing Management:**

- Managed penetration tests for BFSI applications, Infrastructure, and websites, which involved configuring Kali OS, liaising with the pentester, and tracking findings for remediation.

### EDUCATION

---

**Bachelor of Engineering (Computer Science), Sinhgad Institute of Technology**

2017 – 2021 | Pune, India

### SKILLS

---

**Vulnerability Management Detection & Response (VMDR):** Qualys.

**Endpoint Detection and Response:** CrowdStrike.

**Security Information and Event Management (SIEM):** Logrhythm.

**Email Monitoring::** Phishing Email, DLP Email, Personal Email.

**Tools:** AWS Secrets Manager, AWS Guard Duty, AWS Security Hub, Entrust, Imperva WAF, Jira, Service Now, Trend Micro.

**Soft Skills:** Leadership, Project Management, Presentation, Adaptability, Communication Skills.

### ACHIEVEMENTS

---

- **Awarded Star of the Month** for completing the TCS Digital Milestone.
- **Awarded Star of the Quarter** for consistently delivering client deliverables on time, playing a critical role in establishing security controls for a new environment, and implementing domain admin restrictions to enhance the organization's security posture.
