PROFILE

Motivated software developer with a strong foundation in Java, SQL, web technologies and programming concepts. Eager to begin a career as a Software Engineer to apply my technical skills. Looking forward to opportunities that enable growth, skill enhancement, and adding value to the organization as a fresher in the industry.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science Engineering

Sharnbasva University

2020 – 2024

Kalaburagi, India

Pre-University

MAM PU College

2018 – 2020

Kalaburagi, India

Secondary Education,

Jasmeen Public School

2017 – 2018

Kalaburagi, India

PROFESSIONAL EXPERIENCE

Student Intern, Jspider Rajajinagar

Java Full Stack Developer

2024 – present

Bengaluru, India

Developed and maintained web applications using frameworks. Designed and implemented to enhance backend functionalities. Built responsive user interfaces using Web Technologies. Collaborated with team members to integrate frontend designs with backend logic. Gained hands-on experience in Database Management, executing CRUD operations and optimizing queries

SKILLS

- Programming Language : Java
- Web Technologies : HTML, CSS, JavaScript(ES6), JSP, Servlet
- Frameworks : Spring Boot, Hibernate
- Database Management : SQL, MySQL
- Soft Skills : Communication, Problem-solving

PROJECTS

Continental Restro

E-Commerce Website

Developed a full-stack e-commerce web application for dining services. Utilized HTML, CSS, and JavaScript for the frontend and implemented PHP and MySQL for backend functionality. Key features include user authentication, online ordering, and a reservation system.

Product Management System

Developed a dynamic web application for managing product data, including features for adding, updating, and deleting product information. Designed the frontend with an intuitive interface and integrated it with a robust backend for seamless data handling. Leveraged advanced frameworks and tools to implement functionalities such as user authentication, database operations, and efficient data retrieval.

Employee Management System

Created a Java and Servlets-based application for managing employee records, featuring a front-end interface built with HTML and CSS. Integrated a MySQL database to ensure secure and efficient data storage and retrieval, highlighting expertise in backend development and database managements.
