

Ananthalakshmi N

Frontend Developer

mailto: ananthee89@gmail.com

Summary

Highly skilled **Front-End Developer** specializing in **web and mobile application development**, with strong expertise in **HTML, AngularJS, Flutter**, and **basic working knowledge of React**. Passionate about crafting **intuitive user interfaces** and delivering enhanced user experiences. Adept at optimizing front-end design to build **visually appealing, responsive, and high-performing applications**. Committed to continuous learning and staying up to date with emerging front-end technologies.

Skills

Front-End Technologies

- HTML5
- CSS3
- JavaScript
- AngularJS
- React (Basics)
- Flutter, Dart
- Node.js
- MySQL

UI Frameworks

- Bootstrap
- Angular Material
- Metronic

Backend & Database

State Management & Storage

- GetX
- Provider (Basics)
- SharedPreferences

Deployment / Hosting

- Namecheap Server (Basics)

Others

- REST APIs

Projects

Focus on Time

Stashook technologies private limited | 06/2024 - Present,

Tech Stacks: Flutter, Dart, Node.js, MySQL, REST APIs, GetX, SharedPreferences, Angular, Bootstrap, Metronic

Project Description:

- **Focus** is a responsive **web and mobile application** designed for employee **daily timesheet tracking, leave management, and ticketing workflows**.
- The **Timesheet module** enables employees to log time spent on tasks or projects, helping organizations monitor productivity and work allocation.
- The **Leave Management System (LMS)** automates the leave request and approval process, reducing manual effort and improving transparency.

- **LMS Reports** provide insights such as:
 - Employee-wise and reporting-manager-wise leave details
 - Leave status summaries (Applied, Approved, Rejected)
 - Leave balances and historical leave data
- The **Ticketing module (Web)** supports:
 - Ticket creation and assignment
 - Tracking ticket status (**Assigned, In Progress, Closed**)
 - Visibility into **who assigned tickets to whom**
 - Improved issue tracking and accountability across teams
- The application ensures a **user-friendly UI**, role-based access, and seamless performance across devices.

MindBlow (Mobile Application Flutter)

Stashook technologies private limited | 08/2025 - Present,

Tech Stacks: Flutter, Dart, Node.js, MySQL, REST APIs, GetX, SharedPreferences

Project Description:

- **MindBlow** is a mobile application developed using **Flutter** that allows users to **register and log in** to access subject-based learning content.
- During registration, users can **select their preferred subjects**, which are then personalized within the app.
- For each selected subject, users receive **concise learning tips presented in short, easy-to-understand points**.
- Users can:
 - **Copy** tips for quick reference
 - **Download** tips for offline access
 - **Share** tips via social platforms
 - **Add tips to Favorites** for future use
- The app focuses on **personalized learning**, clean UI, and smooth user experience.

inHealth

Stashook technologies private limited | 04/2025 – 08/2025,

Tech Stacks: Flutter, Dart, Node.js, MySQL, REST APIs, GetX, SharedPreferences

Project Description:

- **inHealth** is a Flutter-based mobile health application that allows users to **register and log in** by selecting their **health ailments** during registration.
- Based on the selected ailments, the app provides **personalized health content**, including:
 - **Educational videos** related to the user's conditions
 - **Health tips** presented in short, easy-to-understand points
- Users can:
 - **Watch videos** without autoplay
 - **Search and filter content** based on keywords
 - **Save tips and videos as Favorites** for quick access
- The application focuses on **personalized healthcare guidance**, clean UI, and smooth performance across Android devices.

Testify

Stashook technologies private limited | 02/2025 – 07/2025,

Tech Stacks: Flutter, Dart, Node.js, MySQL, REST APIs, GetX, SharedPreferences, Angular, Bootstrap, Metronic

Project Description:

- **Testify** is a **web and mobile-based quiz application** developed using **Flutter and Angular**, supporting user **registration and login**.
- Users select their **preferred subjects during registration**, and quizzes are dynamically generated based on those selected subjects.
- The application allows users to **attend subject-wise quizzes** with a structured and user-friendly interface.
- Key features include:
 - Timed quizzes with multiple-choice questions
 - Real-time question navigation (Next / Previous)
 - Automatic evaluation and score calculation
 - Result summary with performance insights
- The platform ensures a **consistent user experience across web and mobile**, with secure authentication and responsive design.

Acco-Service Apartment Web Application

Stashook technologies private limited | 09/2023 - 06/2024,

Tech Stacks: Angular, HTML, CSS, Bootstrap, Node.js, MySQL

Project Description:

- **Acco** is a responsive **service apartment and hotel management web application** for short-term and long-term stays.
- Enables users to **search, view, and book apartments/rooms** with hotel-like amenities such as housekeeping and services.
- Designed and developed **user interfaces** using **Angular, HTML, CSS, and Bootstrap**.
- Collaborated with the web development team to ensure **responsive design and smooth user experience**.
- Integrated backend services using **Node.js** and **MySQL** for booking and data management.

Oudatha -Doctor Appointment Booking App

Stashook technologies private limited | 04/2023 -09/2023,

Tech Stacks: Flutter, Dart, Node.js, MySQL

Project Description:

- **Oudatha** is a mobile application that allows patients to **search for doctors, view profiles, and book appointments**.
- Users can select **available time slots** and schedule appointments seamlessly.
- Implemented features such as:
 - API data fetching
 - Doctor availability and slot management
 - **Push notifications**
 - Appointment cancellation
- Built a **responsive and user-friendly UI** using Flutter.

NextGen

Stashook technologies private limited | 11/2022 - 3/2023,

Tech Stacks: Angular, HTML, CSS, JSON

Project Description:

- **NextGen** is a basic **educational web application** that helps students access their syllabus in an easy and interactive manner.
- Content is presented using **graphics and images** to simplify concept understanding.
- Developed a clean and responsive UI using **Angular, HTML, and CSS**.

InstaVoice

Kirusa Software Pvt Ltd |04/2016 - 10/2016,

Tech Stacks: Bugzilla, PuTTY, SQL

Project Description:

- **InstaVoice** is a **P2P Android, iOS, and Windows application** for sending **voice and text messages**.
- Performed **manual testing** and reported bugs using **Bugzilla**.
- Executed SQL queries for data verification and used **PuTTY** for server access.
- Assisted in ensuring application stability and quality.

Assistant Professor

TKSCT College Affiliated to the Anna University, Tiruchirappalli |06/2013 - 10/2015,

Description:

- Handled **theory and laboratory classes** for various subjects.
- Served as **Class In-Charge**, managing academic and administrative responsibilities.
- Guided students in academic activities and practical sessions.

Education

- **Master of Engineering (ME)**
DSCET College Affiliated to the Anna University, Chennai.
- **Bachelor of Computer Science Engineering (BE)**
TKSCT College Affiliated to the Anna University, Tiruchirappalli.
