PROJECTS

Gas Leakage Defense System.

- Mini project in my college days to detect the gas leakage and solve it automatically using IOT.
- <https://youtu.be/vGX37gBPnxE> link for verification.
- This is the group project.
- This Project is mainly designed for detecting and correcting gas leakage automatically. This very helps full to reducing fire accidents.

Bank Of Success

- Bank of success is setting up a bank and need a banking system module to be developed.
- Bank is going to offer 2 types of accounts savings and current and has a functionality That we can open account, close account deposit, withdraw and transfer money. Based on the Specific Feature I worked in the backend Api's.

Job Check

- Job Check is the live project for creating app.
- In this project I worked as a team leader for the Backend team. This is the project to connect Job recruiter and Job Seaker. In this project, we have done backend API for their respective features. For testing purposes, we are using the Junit test and Sonar Test.

Petzey

- Petzey is a web Application which connects the PetOwner having Pets and the Vet Doctor for consulting.
- In this project, we have done backend API for their respective features. For testing purposes, we are using the Junit test and Sonar Test.

WORK EXPERIENCE

Software Developer Trainer.

Pratian Technology.

09/2022 - Present,
