### Career Objectives

Looking for a position in MFA and SSO space where I can contribute to the areas of challenging technical environment demanding skill set in technical infrastructure and team building skills at all levels. Also interested in working with the project having languages like JAVA and OOPs. Proven ability as a resourceful coordinator, quick to learn new skills in fast paced IT environments.

### Certified Skills

**Skill Details:** Java Microservices, Cloud Fundamentals, Relational Databases, Software Testing Essentials, Agile Development, Swagger, TDD For Angular

### Technical Competencies

**Programming Language:** C, C++, Java

**Tools:** Ping federate, Ping directory, Microsoft Azure, Service Now, Security Console, Operation console, SecurID cloud, etc.

### Education Details

Qualification/ Degree	Discipline	Education Institution	University	Year of Completion
High School	High School	N M Joshi Goregaon, Raigad	Mumbai Divisional board	2014
Diploma	Electronics & Telecommunication	Institute of Petrochemical Engg, Lonere, Raigad	Dr BATU university Lonere, Raigad	2017
B.E.	Electronics & Telecommunication	AISSMS College Of Engineering Pune	Savitribai Phule Pune University	2021

### Projects Experience Summary

<b>Project Name</b>	IAM MFA and SSO
<b>Organization</b>	Mphasis
<b>Position</b>	Cybersecurity Analyst
<b>Experience</b>	3.5 years

**Description:**

I am professional with expertise in Azure AD, RSA Authentication Manager and Ping Identity solutions. Skilled in managing access controls, troubleshooting authentication issues and executing RSA Authentication Manager and PrimeKit upgrades.

**■ PingFederate (SSO)**

- A. PingFederate Implementation:** Configured PingFederate as an Identity Provider (IdP) and Service Provider (SP) for SSO integrations using SAML, OIDC, and OAuth protocols.
- B.** Customized authentication policies, token lifetimes, and attribute contracts to meet specific application requirements.
- C.** Facilitated implementation of application onboarding across various protocols such as SAML, OAuth and OIDC, working closely with application owners and development teams.
- D.** Implemented multi-factor authentication (MFA) using PingID and integrated it with corporate VPN, cloud apps, and admin portals.
- E. Ping Directory Monitoring:** Performed regular ping tests to monitor network connectivity and troubleshoot connectivity issues, ensuring optimal performance of critical infrastructure

**■ Microsoft Azure Active Directory (SSO/MFA)**

- A.** Facilitated implementation of application onboarding across various protocols such as SAML, OAuth and OIDC, working closely with application owners and development teams.
- B.** Skilled in implementing and troubleshooting Multi-Factor Authentication (MFA), conditional access policies and Single Sign-On (SSO) across enterprise applications.
- C.** Experience in troubleshooting Microsoft authentication related issues including Azure AD sign-in failures, MFA challenges and conditional access policy conflicts.
- D.** Proficient in using Azure AD Sign-In logs, Audit logs and Microsoft Entra tools in-depth troubleshooting and reporting.

**■ RSA SecurID (MFA)**

- A.** Hands on experience in resolving RSA SecureID related issues.
- B.** Conducted system health checks and performed regular backups in RSA to ensure system integrity and stability.
- C.** Generated and maintained various reports including weekly and monthly summaries, to monitor system performance and provide insights.
- D.** Performed end-to-end RSA Authentication Manager server version upgrades, including planning, execution, validation and post upgrade support.
- E.** Upgraded PrimeKit server versions ensuring minimal downtime, system integrity and seamless business operations.

- Responsibilities:**
- 1. Worked as RSA MFA administrator
  - 2. SSO Administrator.
  - 3. Microsoft Azure administrator.
