EXPERIENCE

Jugyah

May 2024 - Present

Software Engineer

- Developed **Mortgage CRM** from scratch using **ReactJS and NestJS**, streamlining **lead and deal tracking** for employees. Designed schemas, developed APIs, and implemented the frontend ensuring a smooth and efficient work flow. This robust CRM is now actively used by over 200 members of the mortgage team.
- Implemented a **user preference system**, improving **lead generation and user personalization** by seamlessly storing and utilizing user data.
- Improved the **rental and sale flows** in the CRM by enhancing the **quality and information** in each task, leading to a more **optimized and streamlined operational process**.
- Revamped the **jugyah.com** website, including the **landing page, dashboard, and loans page** with eye-catching animations and also developed the **Help Center** from scratch.
- Integrated **Mailmodo** for automated email workflows across several processes, enhancing engagement and communication.
- Created **server-side** pages such as "Projects" and "Locality," which helped in driving over **1.2 million impressions per month** by significantly **enhancing SEO**. Additionally, implemented **schema markup** for pages like properties and projects to further boost search engine visibility.

Jugyah

March 2024 - May 2024

Software Engineering Intern

- Revamped multiple CRM pages, improving UI/UX and responsiveness using **ReactJS, MUI**, and **Shadcn**. Implemented **dynamic tables** to structure lead and deal details, integrating **AG Grid**.
- Built and integrated several backend tasks in NestJS to automate and enhance rental workflow processes, improving agent efficiency and operational clarity. Led the initial implementation of the company's **RBAC system** for 100+ employees, ensuring seamless role-based access and permission management.
- Independently developed the **seller flow** for the CRM (frontend & backend), eliminating the company's reliance on third-party CRM services and saving thousands of dollars in costs.

PROJECTS

Read On Rent

[Website code](#)

Developed a complete **E-commerce platform** with a **Landing Page and Admin Dashboard** using **NestJS, MongoDB, AWS S3, NextAuth, and Tailwind CSS**.

- Landing Page:** Built a user-centric interface with **Styled Components**, secure authentication using **NextAuth**, and **AWS S3** for product image storage. Implemented **Add to Cart, Product Search, Categorized Listings, and Payment Gateway integration**.
- Admin Dashboard:** Designed a **Tailwind CSS-powered** dashboard for managing products and orders, enabling **secure product uploads, order tracking, and restricted access** for authorized administrators.
