## SUMMARY

As a certified Full Stack Developer, I am a dedicated and quick learner with a strong foundation in both frontend and backend technologies. My academic background and certification have equipped me with essential skills in software development, problem solving and object-oriented design. I am eager to apply my knowledge in a professional setting, contribute to team success and continue to grow as a developer.

## PROJECTS

### Hospital Management System

In this project we were members and I was leading the project. In this project we have created a website for hospital and we have specified a section for booking appointment's patients where patients can book their appointment online so they didn't have to wait for doctor's appointment. We have also specified the team of doctors with their education and work experience. In this project my contribution was to design a web page and also check and fix bugs of my teammates.

## CERTIFIED COURSES
