Java Developer

Saransh Inc, Hyderabad, India.

August 2019- March 2020

States SDMS Project

- SDMS is a web Application which acts as a bridge between Un Employed Youth and Organizations
- It has various modules, Roles like Admin, Training Partner, Training Center, Job Fair Organizer, District Manager, Scheme Manager and Unemployed Youth
- Each and every role has different set of functions that can be done (For example JFO creates job fair information, TP creates Training Centers and Assign Trainers to them
- TC creates Batches and capture attendance)
- Un Employed Youth registered in the portal and apply for Trainings that are provided by TC's
- Certification and Ranking will be given to Unemployed youth

after Post Training

- After Training they can apply for placements in Jobmela/JobFair
- Generation of Reports of all categories

Corporate SDMS(Skill Development & Management System)

- Corporate SDMS is all about Engaging, Training (In-House / using a 3rd Party) and Deploying Employees on right projects to 'Effectively Utilize Talents'
- Integrated System that holds Employee, Skill, Certification, Visa info for 'Easy Search & Reporting'
- Key Functions are: Data Intake (Either manual entry thru Form provided or a Bulk upload thru excel), Smart Search (Search using employee-id, skill set, certifications or visa info), Create Trainings (Need base training creation, nominations, tracking attendance...), Training Nominations (Self or thru PM, DUH, DM, ADMIN Roles), Dashboard (Role based, provides reporting info on skill, trainings, competencies...)

Software Developer

Fortunapix, Hyderabad, India.

March 2018- August 2018

Learn Wise App

- The product comprises of E-learning and Assessments
- Developed a jar that accepts a directory which consists of all docx files
- All those files are converted to html and all images are exported and further these html files are converted to JSON and all images are uploaded to AWS bucket

Software Developer

August 2016- February 2018

JobSkills Portal

- This application acts as a bridge between the college students and the organizations
- It has the following modules, Registrations(Student, College, Training Partner, Training Center, Job Fair Organizer), Online and offline sessions and capturing of student attendance, Assessments, tracking of marks and results, Reports of all categories
- Maintain various roles(admin, Training Partner, Training Center, Head Officer, District Officer, Job Fair Organizer, HR and others) and approvals, EOI Registration and their Reports, Creating and publishing of different Jobmela's Information, Dashboards
- In this application the students are open to come and register their details, Once the registration is done they are able to join the online/offline classes that are going to be conducted by APSSDC and they are also able to apply for jobs/attend the

jobmela's which are relevant to their skills by following the job alerts in the application

- The organizations which are registered in the site are free to publish the job alerts and conduct the interview on a particular scheduled date
- Finally we are going to maintain the relevant reports and graphs

Digital Literacy

- Digital Literacy is a survey which captures the household information and each and every individual information in a family
- It has various modules like, Trainers, Capturing House hold Information, Reports
- Trainer's information is registered in the portal by admin and he is assigned to a particular ward
- He is responsible of collecting the house hold information as well as training information and monitoring of trainings in that particular ward
- Finally, Various reports are generated based on registered and trained information
