Profile Summary

“Results-driven MERN Stack Developer and MCA student with 1 year of professional experience in building scalable web applications. Experience in React.js, Node.js, and MongoDB, with a strong focus on secure JWT authentication and Docker containerization. Proven ability to deliver production-ready CRUD systems and responsive website.

Education

SRM institute of science and Technology

- Master of Computer Applications

Pursuing Dec 2025

CGPA: 8.12

Experience

MSYS TECH INDIA PRIVATE LIMITED – Software Engineer - 07/2024- 11/2024

- Developed reusable front-end components using JavaScript(ES6+) and modern CSS frameworks, improving code maintainability.
- Built a responsive UI with React and managed state using Hooks.
- Integrated secure user authentication and product CRUD operations.

Applic Solutions LLP – Software Engineer - 03/2022 - 12/2022

- Validated front-end and backend logic for web modules to ensure high-quality user experience.
- Conducted API testing and cross-browser compatibility checks, ensuring seamless functionality across the MERN stack.
- Partnered with the engineering team to implement structural improvements based on defect analysis and root-cause identification.

Projects

CRUD Authentication(MERN, JWT, Authentication) [∞](#)

- Implemented a secure user access portal using JWT-based authentication and backend middleware to manage protected routes and encrypted data persistence.

Expense Tracker Application: (MERN, Bootstrap) [∞](#)

- Developed a financial management tool that utilizes Mongoose schemas and React state management to provide real-time balance updates.

Blogging Website: (MERN , Routes) [∞](#)

- Built and deployed a content-driven SPA(single Page Application) featuring asynchronous API data fetching and optimized routing for a seamless user experience.

Skills

- **Programming Language:** JavaScript, HTML, CSS
- **Frontend:** React.js, Redux, Bootstrap, TailwindCSS, Responsive Design.
- **Backend:** Express.js, Node.js, REST API Design, Postman, MongoDB.
- **Tools & Platforms:** Git, GitHub, Docker, AWS S3, EC2.
