Mobile : +91-8985457868  
[shaiksajid0103@gmail.com](mailto:shaiksajid0103@gmail.com)

### Professional Summary:

- Overall 8+ years of experience building scalable and responsive web applications.
- Proficient experience in developing web pages using HTML, CSS, JavaScript, React JS and Redux.
- Utilized Next.js 's routing system to create a seamless user experience with client-side navigation.
- Implemented unit tests using Jest and React Testing Library to ensure code reliability and maintainability.
- Utilized Axios and Fetch API to communicate with back-end APIs, retrieving and updating data in realtime.
- Managed project source code using Git version control.
- Utilized SCSS to create modular and organized styles, improving code maintainability and readability.
- Utilized Bootstrap components and grid system to ensure consistent and visually appealing layouts across devices.
- Worked with React Functional components and Class components.
- Used Material UI, CSS media queries and bootstrap for responsive web design.
- Worked with Custom hooks, HOC for re-usability.
- Proficient knowledge in developing single - page applications (SPAs).
- Good Expertise in analyzing the Document Object Model (DOM) Layout, DOM Functions, JavaScript functions, and Using MICROSERVICES.
- Experienced in state management using Redux and React Hooks, and adept ES6+at creating Single Page Applications (SPAs).
- Strong knowledge of CSS React.js frameworks such as Bootstrap and Tailwind CSS for rapid and efficient styling.
- Familiar with backend technologies like Node.js for full-stack Next.js development.
- Well-versed in version control using GitHub and experienced in Redux working within Agile methodologies to deliver projects on time and with high React Hooks quality. • Passionate about writing clean, maintainable code and continuously
- learning new technologies to enhance development workflows.
- Experience in using React JS components, Forms, Events, Keys, Router, Redux.
- Good Experience in React.js for creating interactive UI's using One-way data flow, Virtual DOM, JSX
- Experience in Version Control tools like, GIT and Git Hub.

### Experience Summary:

Worked as a Developer at Navata Road Transport from May 2017 and May 2025.

### Educational Details:

Bachelor of Technology in Mechanical Engineering , graduated in 2017, JNTU-Kakinada.

**Skill Summary:**

- Web Technologies: HTML, HTML5, CSS, CSS3 JavaScript, TypeScript, JSON, Less, Sass etc
- Data Storage: SQL & MySQL
- Web & Apps: Angular, React JS, Redux, JSX, jQuery, jQuery Mobile, AJAX, Bootstrap Responsive Web Design, External.js, Underscore.js, Backbone.js
- Server-side Tools: Node.js, PHP

**PROFESSIONAL EXPERIENCE:****Experience**

March 2023 - May 2025

Project: ZARA &amp; NGI Insurance Domain Project

**Project Description:**

Insurance is a great financial security to an individual's family. An insurance policy gives the family the coverage needed as well as the courage to move on. Insurance is peace of mind for the insured in case of the or medical emergency. This way they would not have to go and arrange money or go into a panic mode.

**Responsibilities:**

- Worked on an Agile (Scrum) Development Team to deliver regular updates to the business team and project managers. Gathering and analyzing the requirements of the Team Lead
- Created Web Applications using React JS, JavaScript, HTML, CSS, Redux, and Node JS(NPM Commands)
- Created View templates/logic using HTML and CSS
- Created Dynamic features using Java-Script Created Dynamic validation code using JavaScript
- Added CSS properties to make the application a responsive website. Created reusable components using React.js.
- Participated in the scrum meeting.
- Created React JS forms using the Controlled Components
- Worked on React JS Virtual Dom and React views, rendering using components that contain additional components called custom HTML tags.
- Worked on an Agile (Scrum) Development Team to deliver regular updates to the business team and project managers. Gathering and analyzing the requirements of the Team Lead
- Created Web Applications using React JS, JavaScript, HTML, CSS, Redux, and Node JS. Created View templates/logic using HTML and CSS
- Created Dynamic features using Java-Script.

Project :Enterprise Web & Mobile Application for Citi Group

Jan 2022 to Feb 2023

**Project Description:**

Developed a highly responsive, cross-platform Single Page Application (SPA) supporting web, mobile, and tablet interfaces tailored to financial services. Delivered core functionalities used across Citi Group's applications with a focus on scalability, performance, and reusable components.

**Roles and Responsibilities:**

- Developed web, mobile, tablet interfaces, as per the functional requirements.
- Involved with all stages of Software Development Life Cycle.
- Closely worked with the Business Analyst and senior manager about the requirements of the project, timeline, Demos, UAT.
- Used HTML5, CSS3, Typescript and Angular 6&7 to design a user-friendly and multi functionality interface.
- Developed the Single Page Application using Angular Directive, Routing, Service, Component, Pipe and Module.
- Developed Common Component library (similar to angular materials or primeNg) using Angular 7, which is being used by whole Citi group in developing their application.
- Developed custom Common components, which is been used across the Citi projects.
- Responsible for the creation of Unit Test Cases for front-end, using the Webpacks package compiler, Jasmine test framework and the Karma test runner. Created clear documentation for the test cases as well.
- Used Angular custom Directives for reusable DOM manipulation and Services to implement Dependency Injection.
- Used Angular build-in template expression to perform two-way data binding
- Made the clear documentation and help team learning writing test cases using Jasmine and karma in angular components and services.
- Designed the UI using Ngprime, Highcharts etc which is collection of Material Design components for Angular.
- Developed Web API using Node.JS and hosted on multiple load balanced API instances.
- Worked with modules like MongoDB and mongoose for database persistence using Node.js to interact with MongoDB.
- Worked with Express.js for development of RESTful web services and middleware configurations.
- Worked with JSON web tokens for authentication and authorization security configurations using Node.js
- Strong communication, analytical and interpersonal skills working within cross-functional teams.
- Worked on cross browser compatibility issues and fix the bugs pertaining to various browsers.
- Involved in deploying the code into the GIT repository and maintain the version control using GIT Extension.
- Involved in daily scrumcalls and sprintmeetings, PI planning's, Agile Technology..

Project: Vision center

Nov 2021 – Oct 2022.

Domain: E-Commerce

**Description:**

Vision Cente is a specialized online platform focused on eye care, providing users with valuable services. These offerings encompass the convenience of scheduling eye checkup appointments and the opportunity to browse and purchase various eye-related products, including contact lenses and eyeglasses.

**Roles and Responsibilities:**

- Designed and developed Solution Card, Top-Up Card, and Total Price Card components, employing a technology stack that included React, HTML, CSS, and Bootstrap. These additions substantially elevated user engagement and enhanced the visual representation of vital data.
- Crafted a dynamic navigation menu using React Router, ensuring a smooth and consistent user experience across many devices.
- Championed effective codebase management practices by embracing version control with Git (Bitbucket), fostering collaboration, and upholding code integrity within the team.
- Actively embraced Agile methodology, engaging in sprint planning sessions and adhering to iterative development cycles, ensuring the timely attainment of project objectives.
- Cultivated cross-functional collaboration by closely collaborating with diverse teams, effectively aligning efforts with project goals, and achieving milestones through teamwork.
- Took the helm in designing and implementing user-centric UI components, focusing on enhancing user engagement and facilitating clear information communication.
- Seamlessly integrated a responsive navigation system that streamlined user access to various application sections, bolstering user-friendliness and delivering a seamless experience.

Project Name: Potbelly(E-commerce)

Aug 2019 – Oct 2021.

Role: React JS Developer

Here I'm worked as a React developer with Node and I have implemented the web application by using React JS with redux with calling the services and binding the response from the APIS.

**Project Description :**

Developed and maintained the Potbelly Sandwich Shop website, focusing on creating an engaging user experience and optimizing for performance. The project involved building responsive web pages, implementing interactive features, and ensuring seamless integration with backend services.

**Responsibilities:**

- Design develops and test HTML5, CSS3, JavaScript, and React.JS with Redux that meets accessibility and web browser standards for website.
- Designed CSS templates for use in all pages on the website working with CSS Background, positioning, text, border, margin, padding, and table.

- Used Next.js page routing to turn application into Single Page Application Worked in using React JS components, Forms, Events, Keys.
- Built reusable UI components such as buttons, modals, and navigation bars to maintain design consistency
- Ensured proper SEO optimizations by utilizing Next.js features getStaticProps/getServerSideProps.
- Configured Redux store and combined multiple reducers to manage application state effectively.
- Collaborated with team members using pull requests, code reviews, and merge requests to maintain code quality.
- Implemented thunk middleware to handle asynchronous operations such as API calls.
- Utilized SCSS for writing modular and maintainable stylesheets, ensuring a responsive and visually appealing design.
- Ensured cross-browser compatibility and responsiveness of the components and pages

Skills: React JS, Next JS, Redux, JavaScript, Typescript, HTML 5, CSS3, Git hub, bootstrap, Node JS, Jenkins, JIRA, Rest API Services.

Project Name: Ameriprice (Trade related website)

May 2017 – June 2019

### **Project Description**

Developed a comprehensive trading platform that allows users to manage their accounts, buy and sell shares, and track their trading history.

### **Responsibilities:**

- Worked on an Agile (Scrum) Development Team to deliver regular updates to business team and project managers.
- Developed reusable Functionalities using ES6 Features in JS and HOC in React.
- Switched multiple page views by using Routing Concepts in React.
- Involved designing in web pages using HTML 5, CSS3, JavaScript, Bootstrap.
- Used React JS for tinplating for faster compilation and developing reusable component.
- Developed the grid, table parts using Ag Grid.
- Implemented the login page as well as giving the access for pages based his/her login credentials.

Skills: React JS, Redux, JavaScript, Typescript, HTML 5, CSS3, Git hub, bootstrap, Node JS, Jenkins, Microservices and JIRA, Rest API Services.
