EDUCATION

2016-2020

UNIVERSITY VISVESVARAYA
COLLEGE OF ENGINEERING

- Bachelor Of Engineering in Information Science

TECHNICAL SKILLS

- Java
- Spring boot
- SQL
- RabbitMQ
- JUnit
- Jenkins
- AWS
- Kafka
- Postman
- Jmeter

LANGUAGES

- English (Fluent)
- Kannada (Fluent)
- Hindi(Basics)

PROFILE

Seasoned Java developer with a passion for crafting robust, scalable software solutions. With 2.5 years of industry experience, I specialize in designing and implementing efficient backend architectures using Java and the Spring Framework. My expertise spans microservices, REST APIs, and Spring Boot, enabling seamless integration and scalability. I am always eager to embrace new technologies and continuously enhance my skills in software development.

WORK EXPERIENCE

- Comviva Technologies Limited** NOV-2020-JUL-2022
Senior Software Engineer
 - Led the backend development of a scalable microservices architecture using Spring Boot, which reduced API response times by 30%.
 - Designed and implemented RESTful APIs to integrate with frontend applications, ensuring seamless data flow and enhancing the user experience.
 - Developed efficient data access layers using Hibernate ORM for PostgreSQL databases, optimizing database performance.
 - Collaborated with frontend developers to integrate backend APIs with Android client applications, ensuring compatibility and high performance.
 - Actively participated in daily stand-ups, sprint planning, and retrospective meetings, following Agile methodologies.
 - Conducted code reviews and provided constructive feedback, fostering a culture of continuous improvement and knowledge sharing.
 - Worked with AWS instances for deploying the services into the cloud.
- Comviva Technologies Limited** JAN-2020 -OCT-2020
Graduate Engineer Trainee
 - Created Kafka consumer using Node.js to log the audit into couchDB database.
 - Optimized database operations
 - Reduced audit logging time.

PROJECTS

- Mobiquity-Pay-Digital-Wallet** OCT-2020 -JUL-2022
 - Led the backend development as part of the project and created RESTful APIs, testing them using Postman collections. The created APIs were integrated with an internet banking web application and mobile application.
 - Optimized database operations.
 - Reduced database space consumption by purging old data.
 - Improved User Experience.
