OBJECTIVE:

Aspiring Frontend Developer with hands-on experience in HTML, CSS, JavaScript, React, and WordPress. Looking to contribute to a dynamic team where I can create responsive, user-centric web experiences and grow my skills in real-world applications.

SKILLS:

Technical Skills:

- **Frontend:** HTML5, CSS3, JavaScript, React JS, Bootstrap, GSAP
- **UI/UX Tools (Basic):** Figma
- **CMS (Intermediate):** WordPress (theme customization, plugin setup, Elementor/Gutenberg, basic PHP)
- **Version Control:** Git, GitHub

Soft Skills:

- Problem-solving
- Creative thinking
- Teamwork & Collaboration

PROJECTS:

1. Tech News Blog Website

Mar 2024 – Apr 2024

Tech Stack: WordPress, Elementor, Rank Math SEO, WPForms, Table of Contents Plus (TOC+)

- Developed a responsive tech blog on WordPress using Elementor for optimal user experience.
- Organized posts into categories and used TOC+ to improve content navigation.
- Added WPForms for contact and newsletter subscription features.
- Optimized SEO with Rank Math, including schema, meta tags, and sitemaps.
- Applied custom CSS and managed updates, performance, and hosting.

2. CodeFlicker Website

Jul 2024 – Oct 2024

Tech Stack: HTML5, CSS3, Bootstrap, JavaScript, PHP, MySQL, GSAP

- Created a dynamic website as a learning project to explore PHP and MySQL for backend development, showing eagerness to learn.
- Implemented create, read, update, and delete (CRUD) functionality for dynamic content management using PHP.
- Connected a MySQL database to store and retrieve client data and service information.
- Built responsive designs with Bootstrap and applied SEO best practices, increasing organic traffic by 20%.
- Enhanced UI with GSAP animations, resulting in a 15% boost in user engagement.

3. E-commerce Website (In Progress)

Nov 2024 – Present

Tech Stack: React JS, CSS3, Bootstrap, GSAP

- Developed a responsive e-commerce website using React JS, Bootstrap, and JavaScript.
- Optimized JavaScript and implemented lazy loading, reducing page load time by 40%.
- Integrated dynamic product search with React, improving user experience and speed through effective problem-solving.
- Implemented real-time product updates using APIs, React, and AJAX calls.
- Enhanced animations and transitions with GSAP, improving user interaction and engagement with creative thinking.
