SUMMARY

I have one year of experience in cybersecurity with a focus on penetration testing, basic scripting, and using a wide range of security tools. I take a hands-on approach, manually testing each endpoint to find vulnerabilities rather than relying solely on automated scans. Alongside offensive testing, I've also worked in SOC environments, gaining experience in incident detection and threat analysis. My current focus is web application exploitation, and I'm actively preparing for certifications like PJPT and PT1 to deepen my knowledge and skills. In addition to this, I'm also a CTF player and have taken part in several Capture the Flag competitions, which have helped me build practical skills in real-world scenarios including exploitation, reverse engineering, and forensics.

EXPERIENCE

Junior Security Consultant

09/2024 Present

ActivBytes

Working on security research hence creating an education platform in various domains including Penetration testing, SOC, Purple teaming and Incident Response.
Indulging in client side projects, understanding and providing clients with solutions to their queries.

Cybersecurity and python Intern

11/2023 07/2024

ActivBytes

During internship I was trained in API security and mastering postman.
Involved in project where I contributed creating attacking surface/ labs which were scenarios from real world

EDUCATION

Integrated Masters of Computer Applications

2019 - 2024

Computer Science and Programming, SCMS School Of Technology And Management (SSTM)

CGPA - 6.6

Higher Secondary Educations

2016 - 2019

Kendriya Vidhyalaya INS Dronacharya

CGPA - 7.1

CERTIFICATIONS

- Junior Penetration Tester (eJPT) - INE
- INE Certified Cloud Associate (ICCA) - INE
- Certified API Security Analyst (CASA) - APIsec University
- Certified Network Security Practitioner(CNSP) - The SecOps group
- Secure development 1001 - OpenSecurityTraining2
- OWASP API Security Top 10 - APIsec University
- Postman API Fundamentals Student Expert
- Jr Penetration Tester - TryHackMe
- Offensive Pentesting -TryHackMe
- API Penetration Testing - APIsec University
- Google Cybersecurity Certificate
- EC-Council Network Defese Essentials(NDE)

PROJECTS

TRAVEL: TOUR RECOMMENDATION SYSTEM

Developed a website to include locals to provide services and contribute to tourism making travel more reliable and flexible. It also uses NLP to suggest places based on different criteria.

SUBSCRIPTION BASED MOVIE TICKET PLATFORM

Developed a website for theatre experience more comfortable implementing subscription plans for users.

KEY ACHIEVEMENTS

- APIsec University ambassador
- TryHackMe - Top 4%
- SaskCybersecurity CTF winner

SOFT SKILLS

Attention to detail, Problem-solving, Communication, Curiosity, Adaptability, Analytical thinking

TOOLS

- Nessus - Intermediate
- Burp Suite - Advanced
- NMAP - Advanced
- Metasploit FW - Advanced
- Postman -Intermediate
- Gophish - Intermediate
- Shodan - Intermediate
- OWASP Zap - Beginner
- Splunk - Beginner

TECHNICAL SKILLS

- OSINT
- OWASP & NIST
- OS
- Python Scripting
- Web application security
- Network Security
- Active Directory
- API Security

PROFILES

- github.com/nav00neeth

LANGUAGES

Proficient in - English, Hindi, Malayalam
