PROJECTS

AUTOMATED FILE ORGANIZER :

Using Python's OS and SHUTIL modules, you can write a script to organize files stored randomly. These modules provide tools to interact with the file system and perform tasks like listing files, creating directories, moving files, and categorizing them based on attributes like file type, name, or modification date.

CLEANING SERVICES WEBPAGE :

Developed a responsive front-end webpage for a cleaning services business using HTML, CSS, and JavaScript. Designed the layout, navigation, and interactive elements to provide users with a seamless experience.
