PROJECTS

Blog App - A Flutter blog app integrated with Firebase allows users to create, read, update, and delete blog posts seamlessly. Firebase handles user authentication, real-time database storage, and cloud functions, ensuring a robust and scalable application. With Flutter's expressive UI framework, the app delivers a smooth and engaging user experience across platforms. Code: <https://github.com/yash1501-arch/blogapp>

Booking App– Using React.js a beautiful frontend is created that enables users to sign up and log in and also allows a JWT token, it allows different users to book places, flats, and villas. Follows MVC patterns. The backend is nothing but Node-Express server and a database like MongoDB.

EXPERIENCE

App Development Intern – APPDID Technologies Expected 2021 As an app development intern, I immersed myself in coding, debugging, and collaborating with senior developers to refine our product. Through hands-on experience, I gained insights into the intricacies of mobile app architecture and learned to navigate agile development cycles. Contributing to real-world projects honed my skills in problem-solving, teamwork, and adapting to evolving user requirements.
