CGPA: 7.96/10

Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Data Mining, Advance Data Structures and Algorithms, Information Retrieval, Image Processing

Project Work

- **Front End Webpages:** Using pure HTML and CSS I developed over 30 single pages websites for brands and Ads. The main idea was to develop webpages focused on SEO and Website Speed and achieved it.
- **Breast Cancer Detection using CNN:** This was created as a part of our Final Year Project. Was able to get a good idea about how ML Algorithms are created and implemented to enhance our lives. Got used to a few ML Modules in Python and gained a better understanding of the languages
