CAREER OBJECTIVE

Driven and detail-oriented Java Full Stack Web Developer with comprehensive training from TAP Academy. Seeking a challenging role where I can leverage my skills to drive success and make meaningful contributions to the team while gaining hands-on experience and professional growth.

PROJECTS

Employee Management System & Banking APIs (Spring Boot REST API)

- Developed a RESTful web application for managing employee records using Spring Boot 3 and Spring Data JPA. Implemented complete CRUD operations (create/read/update/delete), integrated with MySQL database, and designed layered architecture (Controller-Service-Repository). Added global exception handling, validation, and Docker containerization for deployment.

Youtube Clone Web App (HTML, CSS)

- Developed a responsive video-sharing platform replica to demonstrate front-end skills. Implemented custom video player features, a YouTube-like grid layout for videos, and a responsive UI using CSS Flexbox/Grid.

E-Commerce Clone: Amazon (JavaScript, HTML, CSS)

- Designed and developed a responsive e-commerce web application replicating core Amazon features using HTML, CSS, and JavaScript.
- Implemented dynamic product display, add-to-cart, and checkout simulation through DOM manipulation and event handling.
- Ensured mobile-friendly design using flexbox and grid layouts, and optimized performance through clean modular JavaScript code.

CERTIFICATIONS

Java Full Stack Web

Development

: By Tap Academy

The Complete Python

BootCamp

: By Udemy
