

RAUNAK MALLICK

Driven and dedicated Software Developer with experience in building robust web applications using Core Java, JavaScript, TypeScript, NodeJS, React, Laravel, and AWS Serverless. Proficient in developing scalable front-end and back-end solutions, following Agile development methodologies. Highly skilled in integrating REST APIs, managing relational databases, and collaborating effectively in dynamic environments. Passionate about enhancing user experience and delivering high-quality software solutions.

WORK EXPERIENCE

Software Developer

Vyoma Innovus Global Pvt. Ltd. (Kolkata)

Sep 2024 - Nov 2024

- Developed and maintained responsive web applications using Laravel and JavaScript, integrating Tailwind CSS for modern front-end design.
- Built REST APIs and worked on server-side functionalities to ensure seamless backend integration.
- Collaborated with cross-functional teams following Agile principles to enhance application functionality and user experience.
- Implemented scalable solutions and stayed updated with industry trends to optimize web applications.

Full Stack Development Intern

EY - GDS (Remote)

Feb 2024 - Apr 2024

- Designed and developed a responsive car rental website using Django, implementing key features such as user authentication, booking systems, and vehicle management.
- Managed end-to-end development, ensuring a seamless user experience across devices.
- Collaborated with mentors to gather requirements, create wireframes, and build functional prototypes.

EDUCATIONAL BACKGROUND

Master of Computer Application (MCA)

Maulana Abul Kalam Azad University of Technology

Nov 2021 - Jul 2023

- CGPA: 8.89/10

Bachelor of Computer Application (BCA)

Eminent College of Management and Technology (348)

Aug 2017 - Jul 2020

- CGPA: 7.58/10

PROJECTS

- Booklet E-Commerce Bookstore (MERN Stack):** Build a scalable e-commerce web application using React, NodeJS, Express, MongoDB, and TypeScript.
- Job Portal (Full-Stack Application):** A job portal where companies can post jobs, and candidates can apply for them. Use React, NodeJS, TypeScript, MySQL/MongoDB, and Tailwind CSS for a responsive UI.
- Car Rental Web Application (Django):** Designed and developed a responsive car rental website using Django, featuring user authentication, booking systems, and vehicle management. Implemented a full-stack solution ensuring seamless user experience across devices.

SKILLS

Technical Skills & Tools

- Front-End Technologies: React, TypeScript, JavaScript, Tailwind CSS, HTML, CSS
- Back-End Technologies: NodeJS, Laravel, Django, PHP
- Programming Languages: Core Java, JavaScript, TypeScript
- Cloud & DevOps: AWS Serverless (Lambda, API Gateway)
- Database Management: MySQL, SQL, Relational Databases
- Development Tools: Postman, MySQL Workbench, Git, GitHub
- Methodologies: Agile Development, Object-Oriented Programming (OOP)

Analytical & Soft Skills

- Problem-Solving
- Analytical Mindset
- Data-Driven Decision-Making
- Communication Skills
- Documentation
- Knowledge Transfer
- Teamwork
- Autonomous Work

LANGUAGES

- English (Fluent)
- Bengali (Native)
- Hindi (Proficient)

CERTIFICATIONS

- Agile Methodology Virtual Experience Program, Cognizant
- Java Basics, HackerRank
- Java Training, Basant Technologies
