#### Tip-Top Furniture

Sep 2021-April-2022, Kottakal

- Developing Data Access Code by writing Stored Procedures and ORM tools like Entity Framework.
- Creating Web Services using XML Web Services, WCF and ASP.NET Web API for Mobile Application Projects.
- Creating Prototypes for applications using HTML5, Bootstrap and CSS 3.
- Collaborate with Mobile Developers to Understand Data Shapes and Building APIs.

### Software Developer

#### IRSYS

June 2014-Aug 2015, Perinthalmanna

- Developed Web Forms using ASP.NET and C# enhanced by jQuery and AJAX.
- Integrating Various Third-Party APIs.
- Modelling Database Schema.
- HTML5, Bootstrap and CSS
- Developing and Managing Message Queuing Bulk Mail Job.
- Collaborating with UX designers to create User Interfaces from Prototypes.

---

## PROJECT

### Email campaign application software

EC

- can automate your email campaigns, send personalized emails, schedule follow-ups, track unlimited emails for free for a lifetime and many more.
- It also provides insights on your email opens, link click tracking and integration with hundreds of powerful apps, allowing you to streamline your process.
- In addition, you get email templates that can be customized and reuse time and again.
- As a part of advanced email campaign software, it also has a feature of advanced email analytic. it can analyze the results of your emails, check the average open and reply rates, and even monitor the effectiveness of your email templates.

- You can track unlimited email opens, link clicks, get read receipts, instant desktop email open notifications. And the best thing is the recipient will be unaware of all these tracking activities.
- The Email Scheduling feature, allows you to schedule your emails according to different time zone and send your emails according to your convenience. Using this can create and save custom templates for effective email campaigns.
- The templates can be shared among the team for excellent productivity and each template's performance report is generated to analyze which template provides the best result.

## **Human Resource Management Software Solution**

### **HRMS**

- As part of the front-end development team, I contributed to the development of a comprehensive Human Resource Management Software (HRMS) solution aimed at streamlining HR processes such as recruitment, onboarding, attendance, payroll, performance evaluations, and compliance management.
- The software features automated job postings, applicant tracking, new hire onboarding, attendance and leave management, payroll processing, performance reviews, and an employee self-service portal.
- Utilizing Angular and TypeScript, I collaborated with the HR team to translate requirements into technical specifications, ensuring high performance and a user-friendly interface.
- This project reduced HR processing time by 30%, improved employee satisfaction with a user-friendly portal, and enhanced data security and compliance.

## **Property technology platform**

### **PROPERTY CARD**

- The company platform has the ability to manage all the property payments, services, and documents and offers homeowners and tenants with buying and selling of property services, eliminating middle-man and helping homeowners to list home for free, and save money by making sure the lowest rate are available with flexible bundle deal.

---

## **EDUCATION**

### **MCA**

Bharathiyar University • Dec-2022

### **BCA**

Bharathiar University • Sep-2018

### **Higher Diploma in Software engineering**

NIIT • Sep-2016

### **PHP Certification**

NIIT • 2016

---

## **SKILLS**

Angular, ReactJS, Redux, ES 6/7, Typescript

HTML, CSS3, Bootstrap, Material UI

C#, MS ASP.NET Web API, Mvc, ASP.NET Core, Jira, Git

JavaScript

Ngrx, TypeScript, Angular CLI, RxJS, Angular Material, HTML, CSS, Angular

ASP.NET Framework, MVC, MS-SQL, JQuery and AJAX, C#
