PROFESSIONAL SUMMARY

- Full Stack Developer with over 2 years of hands-on experience delivering scalable, end-to-end solutions using Java, Spring Boot, React, and Flutter.
- Specialized in building and maintaining RESTful APIs using Spring Boot, Hibernate, and MySQL, with a focus on clean architecture and reusability.
- Adept in both web and mobile application development, leveraging Flutter for cross-platform apps and React for dynamic web interfaces.
- Successfully developed and deployed multi-tenant ERP platforms and healthcare applications in fast-paced startup environments.
- Experienced in managing full application lifecycles—from requirement gathering and UI/UX collaboration to backend design, testing, and deployment.
- Proven ability to collaborate with cross-functional teams and stakeholders to deliver products aligned with business goals.
- Skilled in Firebase integration for real-time features, push notifications, and cloud-based storage for mobile apps.
- Strong focus on performance tuning, secure authentication flows, and efficient data management strategies in both monolithic and microservice setups.
- Track record of maintaining production-grade applications with frequent feature releases and tight deadlines.
- Passionate about writing maintainable code with strong emphasis on testing, version control (Git), and continuous integration practices.
- Quick learner and self-starter, capable of ramping up on new technologies and frameworks with minimal supervision.

SKILLS

- Java
- Dart
- JavaScript
- Spring Boot
- Flutter
- React Js
- MySQL
- NoSQL
- Git
- RESTful API Development
- Firebase
- Microservices
- Jenkins
- Android
- Insomnia
- Html
- CSS
- TypeScript

EMPLOYMENT

Flutter Developer - Java Developer – Full Stack Developer, 10/2023 - Current

DMT Soft - Hyderabad, India

- Leading full stack development using Java (Spring Boot), Flutter, and React in a dynamic startup environment.
- Designing scalable REST APIs with Spring Boot and Hibernate for multi-tenant SaaS solutions.
- Collaborating with cross-functional teams to deliver real-time features using Firebase and MySQL.

PROJECTS

SchoolBook ERP (EdTech ERP System)

Tech Stack: Flutter, ReactJS, Spring Boot, Hibernate, MySQL, Firebase

Role: Lead Full Stack Developer

- Designed and developed a multi-tenant ERP platform tailored for schools and colleges.
- Created individual Flutter apps for students, teachers, and administrators, with real-time push notifications via Firebase.
- Developed the React-based SuperAdmin portal for centralized control.
- Built secure REST APIs with token-based authentication and role-based access control.

Varanous Labs (Pharmaceutical Management Platform)

Tech Stack: Flutter, ReactJS, Spring Boot, Hibernate, MySQL, Firebase, SMTP

Role: Full Stack Developer

- Engineered robust backend services in Java to manage pharmaceutical inventory, prescriptions, and analytics.
- Developed responsive customer-facing website using ReactJS.
- Created a Flutter-based admin dashboard for order processing and inventory control.
- Ensured smooth API integration with high data consistency and secure operations.

Roentgen Diagnostics (Remote Diagnostic Booking App)

Tech Stack: Flutter, Firebase

Role: Frontend Developer

- Designed a mobile-first diagnostic booking system enabling home visits and real-time appointment sync.
- Built the frontend in Flutter with Firebase Realtime Database for instant updates.
- Integrated user accounts, appointment logs, and reports access.

GarageBook (Garage Management App)

Tech Stack: Flutter, Spring Boot, Hibernate, MySQL

Role: Full Stack Developer

- Delivered an all-in-one app for garage owners to manage vehicle service schedules, invoicing, and customer records.
- Built Flutter frontend with an intuitive calendar and service tracking UI.
- Created a secure, scalable backend using Spring Boot and Hibernate.
- Implemented notification features and PDF export functionalities for reports and invoices.

Photorista (Photography Portfolio and Booking Platform)

Tech Stack: Flutter, Firebase

Role: Module Owner

- Developed a portfolio display and appointment booking app for freelance photographers.
- Integrated Firebase Storage for Video uploads and real-time sync.

Apartment Management System (Community Living Platform)

Tech Stack: Flutter, Firebase

Role: Cross-platform App Developer

- Designed API contracts between the frontend and backend services.
- Ensured smooth deployment, minimal bugs, and user-friendly UI for non-technical users.

EDUCATION

03/2023

Bachelor of Technology (B.Tech), Electronics & Communication Engineering (ECE)

RVR & JC College of Engineering, Andhra Pradesh

ACHIEVEMENTS

- Tech Champion Award – Recognized for outstanding performance and technical excellence in delivering full-stack solutions across multiple projects.
- Deployed 5+ production-ready applications end-to-end, managing both backend and frontend stacks independently.
- Spearheaded multi-tenant architecture design for SchoolBook ERP, improving scalability and reducing onboarding time for new clients by 60%.
- Developed and released 4+ cross-platform mobile apps using Flutter with Firebase and Spring Boot integrations.
- Contributed to multiple critical modules across web and mobile platforms in startup environments, helping accelerate go-to-market timelines.

Place: Hyderabad
