PROFESSIONAL EXPERIENCE

Koloursyncc - Frontend Developer

Oct 2023 – Oct 2024

- Engineered a high-performance, SEO-optimized interior design platform using React.js, enhancing user engagement and accessibility.
- Conceptualized and executed a luxury-themed, fully responsive UI with Tailwind CSS and custom animations ensuring an elegant and user-friendly experience across all devices.
- Elevated application efficiency through lazy loading, code splitting, and image optimization, reducing load time by 30%.
- Facilitated seamless collaboration in an agile environment, contributing to code reviews and cross-functional coordination with backend engineers and designers.
- Contributed to an open-source project on GitHub using React.js, collaborating with a team of developers to add new features and fix bugs.

Busy Parrot - Frontend Developer Intern

July 2023 – Sept 2023

- Developed and maintained responsive web interfaces using HTML, CSS, and JavaScript ensuring seamless and engaging user experience.
- Gained hands-on experience with modern frontend library REACT to build dynamic web applications.
- Enhanced website functionality and design for better user experience.

PERSONAL PROJECTS

MERN Stack E-Commerce Shopping Website

- Developed a scalable, full-stack E-Commerce platform using MERN Stack ensuring seamless user experience across devices.
- Implemented comprehensive features including user authentication, product management, and payment processing
- Designed an intuitive product catalog with advanced search, filtering, and sorting capabilities.

Expense Tracker

- A full-stack expense tracking application that allows users to efficiently manage multiple budgets.
- Users can add, update, and delete expenses, categorize them, and monitor real-time budget usage.
- Utilized React.js for the frontend, Node.js and Express.js for backend APIs, and MongoDB for data storage.

Weather Telecast

- Designed and developed a dynamic weather application that allows users to view current weather for multiple locations.
- Weather API is used to fetch and display weather data.

EDUCATION

B.E. in Computer Engineering

2019 - 2023

Vivekanand Education Society's Institute of Technology, Mumbai

CGPA: 7.04

CERTIFICATES

- Full Stack Development: Preplnsta Prime, 2023
- MERN Stack Development: 30Days Coding
