WORK EXPERIENCE

TATA CONSULTANCY SERVICES

Hyderabad, Telangana

System Engineer – Application development – Java, DevOps, SpringBoot

- Worked on developing an internal application based on microservices architecture for a logistics firm project right from the 1st sprint and ensured successful project completion.
- Coded solutions and unit test cases to deliver requirements/stories per defined acceptance criteria.
- Analyzed requirements from the business documentation, proactively collaborating with Business analysts and QA's.
- Design, Implementation and maintain Java based applications that can be high volume and low latency, required for mission critical systems.
- Followed Continuous Delivery practices as needed to deliver High-Quality Application.
- File upload and Export to Excel mechanisms that I developed using Java code saved the customers' time and effort and enhanced the application's user-friendly nature.
- Worked on automating several processes and calculations using Scheduled CRON jobs.
- Involved in creating interactive prototypes and design concepts for the application.
- Experienced in building and deploying containerized application images using Docker images (S2I framework).
- Worked with architects from different projects and cross-functional teams to design and implement appropriate solutions and contributed extensively in creating Technical Design document (TDD) for the project.
- Majorly involved in fixing the vulnerabilities and review comments from security tests like SAST, DAST and penetration testing for the application server.
- Designed and implemented RESTful APIs to facilitate seamless communication between front-end and back-end systems.

ACCOMPLISHMENTS

- Won Star of the Month Award twice in recognition for a record of outstanding performance and accomplishments.

- Won on the spot award in recognition for my dedication and commitment.

CERTIFICATIONS

- Achieved Course Completion Certificate on Core Java
