PROJECTS

Order Management POS (Point of Sale)

- This is to check the sales of the store and to check the transactions. When the customer pays for the item, it goes through the POS unit which we can validate the item details and payment details. If the customer faces any issues while purchasing an item POS team will look around to find a solution.
- Our aim is to provide 24*7 support service to customers by managing applications like trade-in, return and exchange for better shopping experience.
- Technologies used Java, MySQL, Microservices, Spring Boot, Rest API, Kubernetes, Splunk.

Online Book Store

- An online book store software project acts as a central base containing various books in stock along with their title, author and cost. Our aim is to develop a user friendly online platform for browsing and purchasing books.
- This Web project is a website that acts as a central book store and developed using asp.net as the front end and SQL as a back-end.
- Technologies used Java, MySQL, JDBC, Servlets, Hibernate, Spring.

TRAINING

JSpiders

Java Full Stack Development

May 2024 – Apr 2025

- Currently undergoing a Java Full Stack Training course at JSpiders Hyderabad, gaining hands-on experience in J2SE, J2EE, Hibernate, Spring, Spring Boot, SQL and front-end technologies like HTML, CSS, JavaScript.
- Developing proficiency in building web applications, focusing on both front-end and back-end technologies to ensure seamless integration and functionality.
