Professional Summary

Dedicated and motivated professional with a strong background in software development and system architecture. Proven ability to lead teams and deliver high-quality solutions in a fast-paced environment. Strong communication and collaboration skills, with a focus on continuous learning and innovation.

Technical Skills

Proficient in Java, JavaScript, Python, and C++. Experienced in front-end technologies like HTML, CSS, and React.js, as well as back-end technologies like Spring Boot, Django, and Node.js. Strong understanding of databases such as MySQL, PostgreSQL, and MongoDB. Skilled in cloud platforms like AWS and Azure, and familiar with DevOps practices and CI/CD pipelines.

Projects

1) E-Commerce Web Application ~ [Project GitHub Link](#)

A full-stack web application designed for e-commerce, featuring a user-friendly interface and robust backend logic. The application includes product catalog, shopping cart, checkout process, and user authentication. Utilized modern technologies and best practices to ensure scalability and security.

2) Central Animal Records Web Application

A web application for managing animal records, providing a centralized platform for data entry, retrieval, and reporting. The application is built with a focus on data integrity and ease of use for administrators. It includes features for record creation, updates, and comprehensive reporting capabilities.
