Project

3RI Feedback System / 3RI Technology / Pune

- Developed a robust 3RI feedback system using Django framework in Python.
- Implemented core features including user registration, login, and feedback submission.
- Ensured secure registration and login processes for seamless user experiences.
- Designed an intuitive feedback submission form to streamline data collection.
- Demonstrated ability to create user-friendly web applications with essential functionalities.

SANCHAR / TATA Motors / Lucknow

- Led a project centered on developing customized HTML forms tailored for company-specific needs.
- Integrated these forms with a database to establish a system for permanent record-keeping.
- Designed user-friendly forms to enhance ease of data entry and interaction.
- Utilized XML and JavaScript for efficient data interaction and user engagement within the forms.
- Implemented secure data storage practices to ensure the confidentiality and integrity of sensitive information.
- Gained hands-on experience in database design, form development, and efficient data management practices.

Women Safety App / B-Tech / Kolhapur

- Implemented a low-cost GPS-based tracking solution to provide real-time location tracking.
- Designed the app to activate with three shakes for quick and discreet access.
- Utilized GPS technology to accurately identify and extract longitude and latitude coordinates.
- Integrated Google Maps functionality to plot real-time location data for enhanced visibility.
- Key feature includes sending location URLs to registered contacts for immediate assistance in dangerous situations.
- Demonstrated proficiency in Android app development and leveraging GPS technology for safety applications.
