Objective:

Motivated and detail-oriented Cybersecurity Professional with hands-on experience in vulnerability assessment, penetration testing, mobile application security, and security audits, including banking and financial systems. Certified in advanced offensive security and ethical hacking, with a proven track record in bug bounty programs and responsible disclosure, helping organizations identify and remediate critical vulnerabilities. Seeking a Security Analyst role in a forward-thinking organization to apply technical expertise and strengthen overall security posture.

Technical skills:

- Vulnerability Assessment and Penetration Testing
- Languages: Python, Bash Scripting (Automation)
- Networking
- Web & Mobile Application Security Testing
- Linux
- GitHub
- AWS (Amazon Web Services)

Tools:

- Burp Suite
- Nessus
- Mobile Security: MobSF, Frida, Apktool
- Metasploit
- Nmap
- Wireshark

Behavioral skills:

- Leadership
- Team Player
- Great Communicator
- Disciplined and Punctual
- Strategic Planning

Educational Qualification:

- **BCA:**
 - Specialization: Cloud Technology and Information Security
 - Percentage Obtained: 76%
- **12th:**
 - Stream: PCM
 - Percentage Obtained- 75%
- **10th:**
 - Stream: General
 - Percentage Obtained- 70%

Professional Experience:

Security Analyst –

Innowave IT Infrastructures Limited (On-Site)

February 2025 – Present

- Performed Vulnerability Assessment and Penetration Testing (VA/PT) for over 20+ critical clients, including banks, financial institutions, stock brokers, and enterprise-level companies.
- Conducted end-to-end testing of web and mobile applications, internal infrastructure, APIs, and cloud environments, focusing on business-critical systems.
- Delivered detailed audit reports aligned with compliance standards (ISO 27001, RBI, SEBI) and helped clients close high-risk vulnerabilities.
- Led testing on high-impact targets, ensuring minimal risk exposure and enhancing overall security posture.
- Worked directly with client teams to explain impact, reproduce issues, and guide secure remediation practices.
- Specialized in banking and financial audits, identifying logic flaws, misconfigurations, insecure integrations, and data exposure risks in production-grade systems.

VAPT Intern

Cyraacs

August 2024-December

- Conducted in-depth vulnerability assessments and penetration tests for various web and mobile applications.
- Collaborated with teams to develop and implement remediation strategies for identified vulnerabilities.
- Prepared detailed reports with actionable recommendations, improving client security posture.
- Strengthened hands-on experience with tools such as Burp Suite, Nessus, and Nmap in real-world scenarios.

Independent Security Researcher

Remote

January 2024 – Present

- Found vulnerabilities in HackerOne programs, earning awards and badges from companies such as Eero, Kiwi, Yoti, Tari, Zomato, k3s, Avalara, Topcoder, Wellsfargo, and ABB.
- Featured in HackerOne Researcher Spotlight for outstanding bug hunting.
- Reported numerous vulnerabilities, with many acknowledged as valid but marked as duplicates, reflecting my thoroughness and accuracy in identifying issues.
- Delivered high-quality vulnerability reports, enhancing cybersecurity.
- Recognized in HackerOne Hall of Fame for significant contributions to the security community.
- Continuously updated skills with the latest security trends.

Cybersecurity Intern

Remote, Skillvertex

August 2022 – September 2022

- Developed detailed reports on cybersecurity tools and techniques.
- Conducted a comprehensive VAPT project on Windows, including detailed findings and recommendations.

- Collaborated with peers to deepen understanding of cybersecurity concepts.
- Applied various tools and methodologies in practical projects.

Certifications:

- **Web Application Penetration Tester eXtreme (eWPTX)** –
eLearnSecurity
 - **Certified AppSec Pentester (CApen)**
Secops Group
 - **Cybersecurity Certification**
Skill-Vertex
 - **Certified Ethical Hacker (CEH)**
Techunique Academy
 - **Introduction to Dark Web, Anonymity, and Cryptocurrency**
Codered
 - **Ethical Hacking Essentials (EHE)**
EC-Council
-

Projects:

- **Vulnerability Assessment and Penetration Testing**
Conducted thorough security assessments on various platforms to identify and address vulnerabilities.
 - **Automation Tool Development**
Created automation tools using Bash scripting and Python to enhance vulnerability discovery.
 - **Securing and Testing Website Hosting on AWS**
Analyzed XSS, CSRF attacks, and S3 bucket security for website hosting on AWS
-

Hobbies:

- **Football:** Engaged in competitive football, showcasing teamwork, strategic thinking, and physical fitness.
- **Reading Books:** Passionate reader with a focus on expanding knowledge and understanding diverse perspectives.
- **Chess:** Skilled chess player, developing strategic thinking, problem-solving abilities, and patience
