PROJECTS

Electricity Billing System

Our project team designed “ELECTRICITY BILLING SYSTEM” by keeping only one thing in mind that it must be reliable and easy to use. The Electricity Billing System has been developed to override the problems prevailing in the practicing manual system.

This software is supported to eliminate and in some cases reduce the hardship faced by this existing system

Moreover, this system is designed by the particular need of the company to carryout operation in a smooth and effective manner

The main objective of the project on Electricity Billing System is to manage the details of electricity, unit of energy, bill, stored record and electricity board

This project is in JAVA with source code

· Portfolio Website

A Portfolio means a collection of financial assets such as stocks, bonds, debt instruments, mutual funds and cash equivalents etc.

A Portfolio is planned to stabilised the risk of non performance of various investments alternatives as the are held directly by investors and managed by financials professionals

The main objective of the project is security of principle investments, consistency of returns,

Capital growth, marketability

This project is in PHP (hypertext pre-processor)
