| | 19 | INTERNET PAYMENT GATEWAY | | | Pending |
| | 20 | ACCOUNT ACTIVATION | BY USING MAIL LINK / OTP | | From AP side |

Proposed Test Solution and Approach:

The key testing imperatives Sidhwani Technologies considers for successfully providing QA services for the Web Application System as listed below:

Functional Testing of Online ordering system on Web:

Functional Test Planning

- Identification of Business Functional Requirements from Business Requirements/Functional specifications.
- Identification of Test scenarios
- Compatibility Test Planning
- Identification of the Test scenarios to be executed on 3 individual supported browser on Microsoft Edge, Firefox, Chrome.
- User Security Test Planning
- Identification of User level Security Testing scenarios
- Identify Test requirements for Regression Testing based on the current Application functionality

Testing Strategy /Test plan containing:

- Scope of testing to be conducted
- Testing resources
- Finalized Test Requirements for:
- Business Functional Testing
- Regression Testing
- Compatibility Testing
- User Security Testing
